

Atlas Planning Platform

One Digital Intelligent Platform for All Your Planning Needs.

Accelerate your digital transformation with our single, AI-powered SaaS solution that connects and orchestrates your entire supply chain so you are always in sync. No matter where you are in your digital journey, Atlas helps you shape new opportunities, reduce risk, break down silos, and thrive through escalating volatility.

Digital Intelligence

Take away the guesswork, augment intelligence and increase visibility through automation and predictive and prescriptive knowledge.

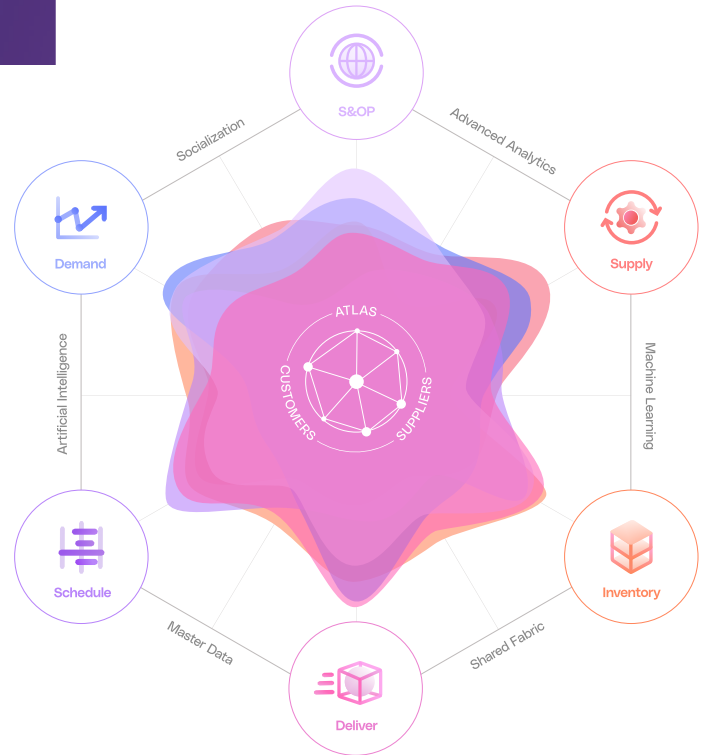

Network-wide Visibility

Instantly collaborate with your entire network to maximize opportunities and reduce risks.

“Having an intelligent planning platform to manage the complexity of Randa’s inventory while continuously optimizing inventory and replenishment to shifts in demand has been a game changer.”

CIO – RANDA APPAREL & ACCESSORIES

Tune to Your Specific Needs

Continuously synchronize business processes across time horizons in real time, on one platform.

Connect Everywhere

Atlas provides a single point for you to bring in a variety of data sources and systems.

A Single Platform for your Digital Supply Chain

S&OP

Go beyond S&OP by uniting disparate elements of your business into a single powerful process that integrates volumetric and financial plans to maximize business opportunities and minimize risk.

Demand Planning

Leverage AI and machine learning to quickly sense and respond to changes in demand—everything from evolving buying patterns to unplanned events to the impact of marketing promotions.

Inventory

Create smart tactical and multi-echelon inventory strategies that ensure you'll hit your customer service levels and avoid stockouts while keeping your overall inventory investment reliably right-sized.

Schedule

Synchronize multi-plant schedules, allocate factory resources, marshal materials, and tune manufacturing to efficiently reach your business and sustainability goals.

Supply

Meet product requirements based on the best trade-offs between resource constraints around material, labor, and plant capacity—as well as the impacts of shortages, downtime, schedules, and more.

Deliver

Link distribution planning and transportation optimization to streamline the process of converting an order to shipment using advanced algorithms that handle real-world constraints.

The Atlas Difference

- ✓ **Artificial Intelligence**
Make speedy, smart supply chain moves with confidence.
- ✓ **Advanced Analytics**
Let your data lead you to more confident, better-informed decisions.
- ✓ **Multi-Enterprise Collaboration**
Align, unite and share one vision of supply chain excellence.
- ✓ **What-If Scenarios**
Stop guessing the future and test it.

“We see John Galt as a Partner, not just a solution. They take the time to learn our business, and they give recommendations based on our business goals.”
