

Cofinity-X

**Trace-X**

# Value Proposition

## Trace-X

For Quality Managers in the Automotive Industry, that are responsible for the high-quality-standards of premium OEMs.

Who seek to increase productivity in managing material and build quality related issues fast, secure and standardized to, in the end, being able to reduce quality or recall costs significantly.

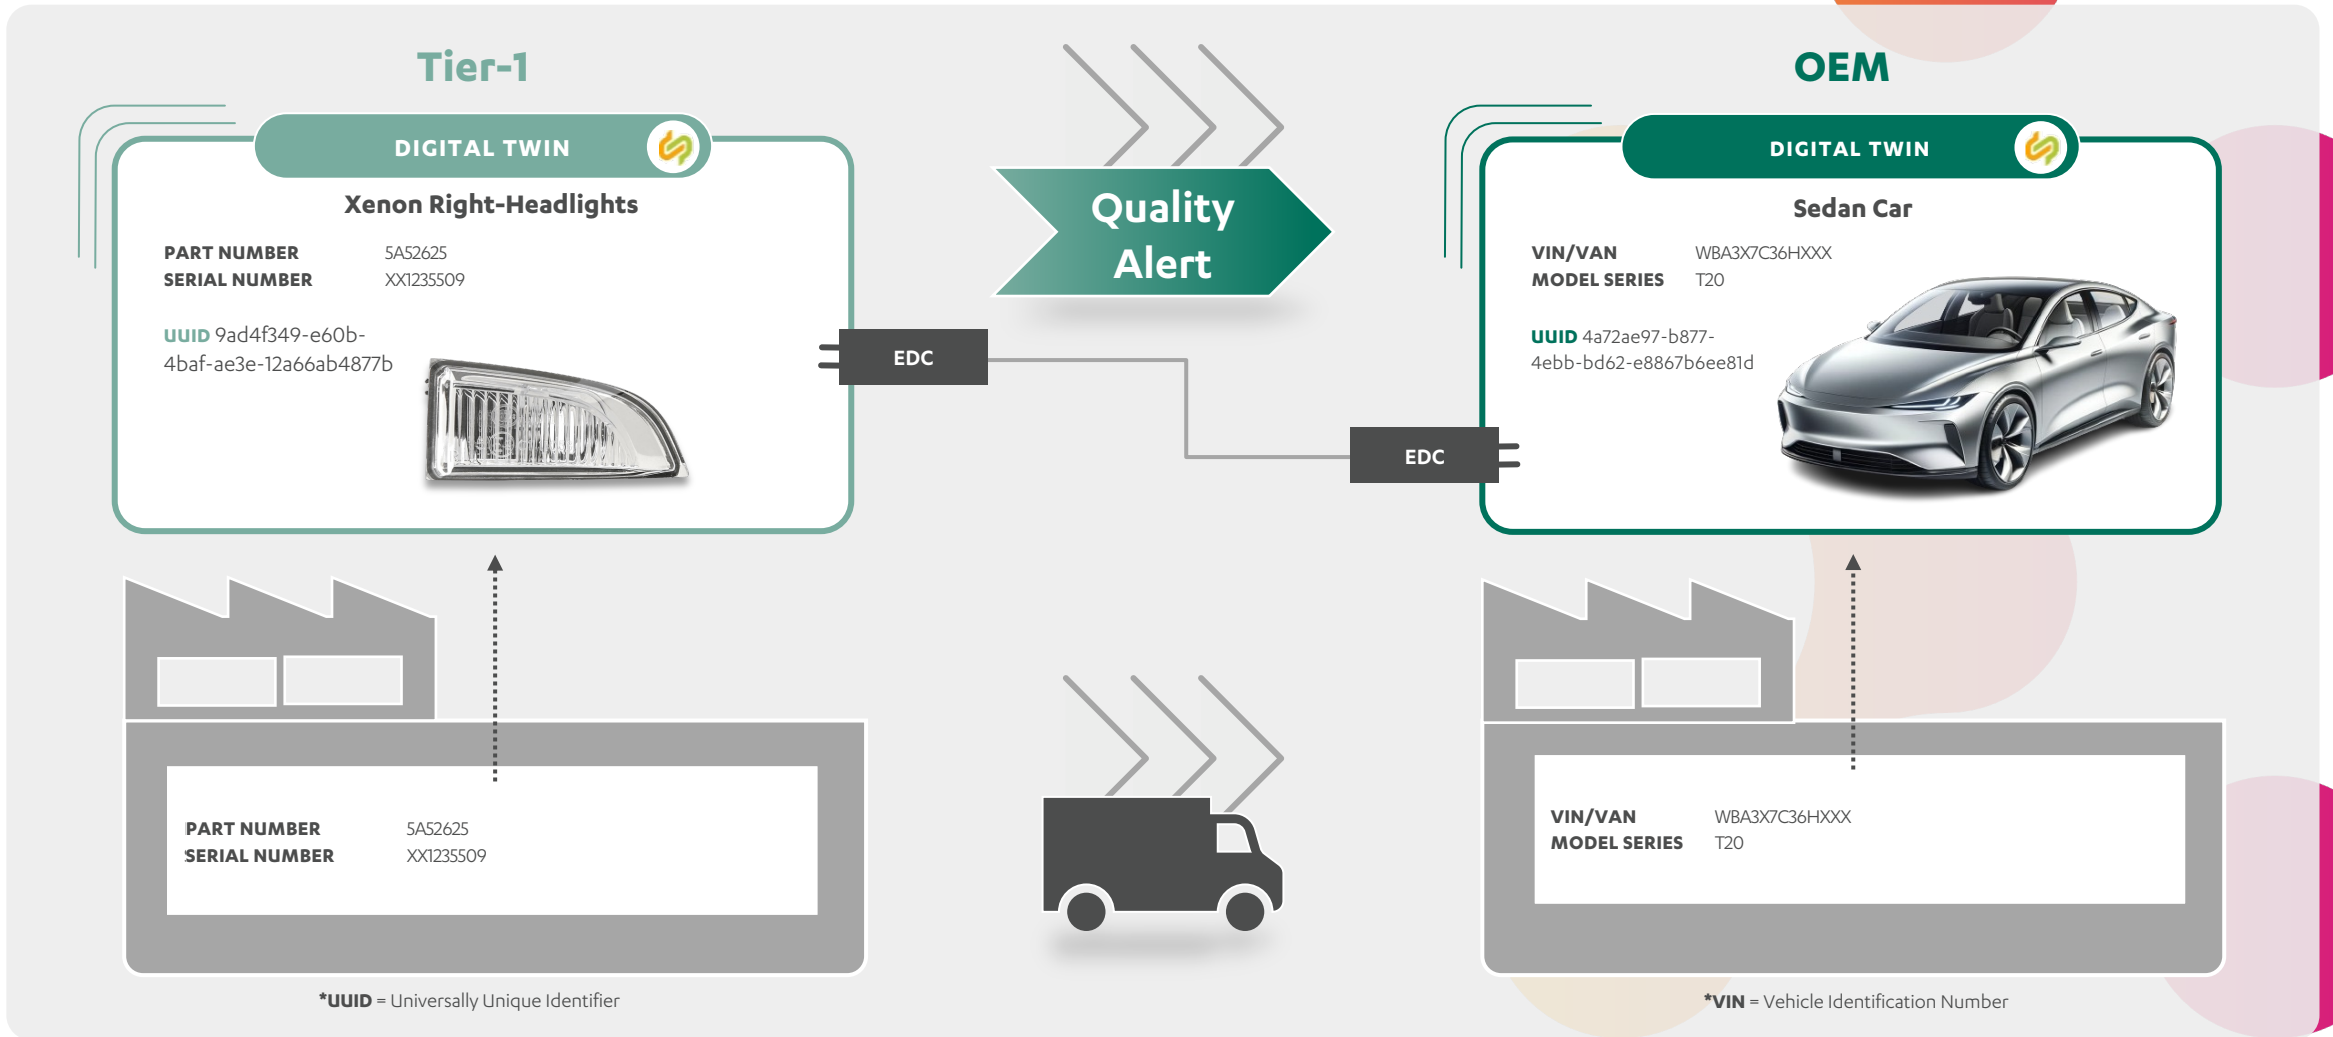

Cofinity-X Trace-X empowers Quality Managers to proactively trigger Quality Alerts and investigate Quality Warnings based on Catena-X Traceability Semantic-Standards.

Being a one-of-a-kind software solution on the market, that really leverages the central promises of the Catena-X Dataspace: Data Sovereignty, Standardization and Traceability.

# Storyline

## Trace-X: Send Quality Alerts and Reduce Recall Costs

Available  
**NOW**

**Use Case:  
Traceability**

**EDC Connector**

Eclipse Dataspace Components

**Reducing Quality &  
Recall Costs**

**1 up – 1 down  
Principle**

**Trigger Quality Alerts**

**Investigate Quality Warnings**
