# DATAMOTIVE
Eliminating Cloud Boundaries

HYBRID, MULTI-CLOUD WORKLOAD PORTABILITY

SCALE, MIGRATE, OR RECOVER.
ANY WORKLOAD, ANY SIZE, ANY CLOUD.
10 MINUTES GUARANTEED.

DATAMOTIVE

What We Do

We **_SCALE, MIGRATE, RECOVER_** workloads from any cloud to any cloud leveraging **_target cloud infrastructure services_**

How We Do It

10mins	**30**%	**60**%	**100**%
CTO / RTO	FASTER SLA	LOWER TCO	DATA CONSISTENCY

Our Engagement Model

3 simple steps to significantly accelerate your cloud journey, reduce TCO and optimize your cloud operations?

Collaborate;
demo, design sessions

Configure; deploy,
setup and replicate

Operate; Day 2
operations, track changes

DATAMOTIVE FEATURES

DATAMOTIVE

10 Minute Native Cloud Recovery

Recover workloads in cloud-native format in 10 minutes regardless of workload size. 250GB workload or 8TB, always recover in 10 minutes.

Agentless, Incremental Replication

No agents on protected workloads. No performance impact and no unnecessary security risks. Only changed data is replicated.

Built-in Performance & Security

Built grounds up for enterprise workloads in high latency environments with compression, deduplication and encryption.

Business Service Protection

Group related VMs that form a service. Recover with complete runbook automation (scripts, boot orders and network configurations).

DATAMOTIVE

Full-Stack Workload Replication

Workloads are protected and recovered in their entirety. Includes OS, registry, security configs, user profiles, applications and their data.

Non-Disruptive Recovery Drills

Perform unlimited, on-demand test recovery drills. Validate for DR and Migration without obstructing production replication.

### Intuitive, Full Visibility Management

Intuitive user interface and SDKs with VM discovery, protection policies, services and job monitoring with audit capabilities.

Easy, Non-Disruptive Deployment

Only deploy Datamotive virtual appliances in source and target environments and get started in minutes. No agents, no network overheads.

OUR OFFERINGS

Easy Migrate

Secure a 10-minute cutover to any cloud

Run applications on any cloud any time

Substantial reduction to business service disruption

Obtain data and application consistency from day one
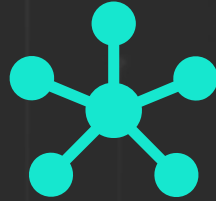

Easy Hybrid Business Continuity

Obtain industry's first 10-minute recovery irrespective of source cloud, platform and size

Consolidate Disaster Recovery across various clouds

Policy based Ransomware recovery

Backup and Snapshot management

One data copy for all Business Continuity needs

Easy Analytics

Secure access to analytics platform, application and data in 10-minutes

Gain ability to make data decision based on real time data

REAL TIME NOW EQUALS 10-MINUTES

Easy Migrate

DATAMOTIVE

ONLINE, AGENTLESS, INCREMENTAL, CLOUD NATIVE WORKLOAD MIGRATION

Production Workloads

Target Cloud

Block Storage

**Target Site
(VMware, AWS, Azure, GCP)**

Industry best CTO SLA of 10 Minute regardless of workload size

Zero production & security impact with Agentless, Incremental Replication

Built-in Performance, Scalability & Security with Encryption, De-dedupe and Compression

Full-stack workload replication including OS, Applications, Application data, OS configs, etc.

Non-Disruptive, secure Test Drills with full runbook automation and audit trail visibility

10 MIN CTO REGARDLESS OF SIZE

INDUSTRY FIRST, TRUE CROSS-PLATFORM ONLINE MIGRATION

ZERO DATA LOSS

OUR INTIUTIVE USER

Home Page; a comprehen...
your hybrid cloud environ...

Track your cutover, recovery process from a single window

MIGRATION REFERENCE ARCHITECTURE

DATAMOTIVE

AGENTLESS, INCREMENTAL, CLOUD-NATIVE REPLICATION & RECOVERY
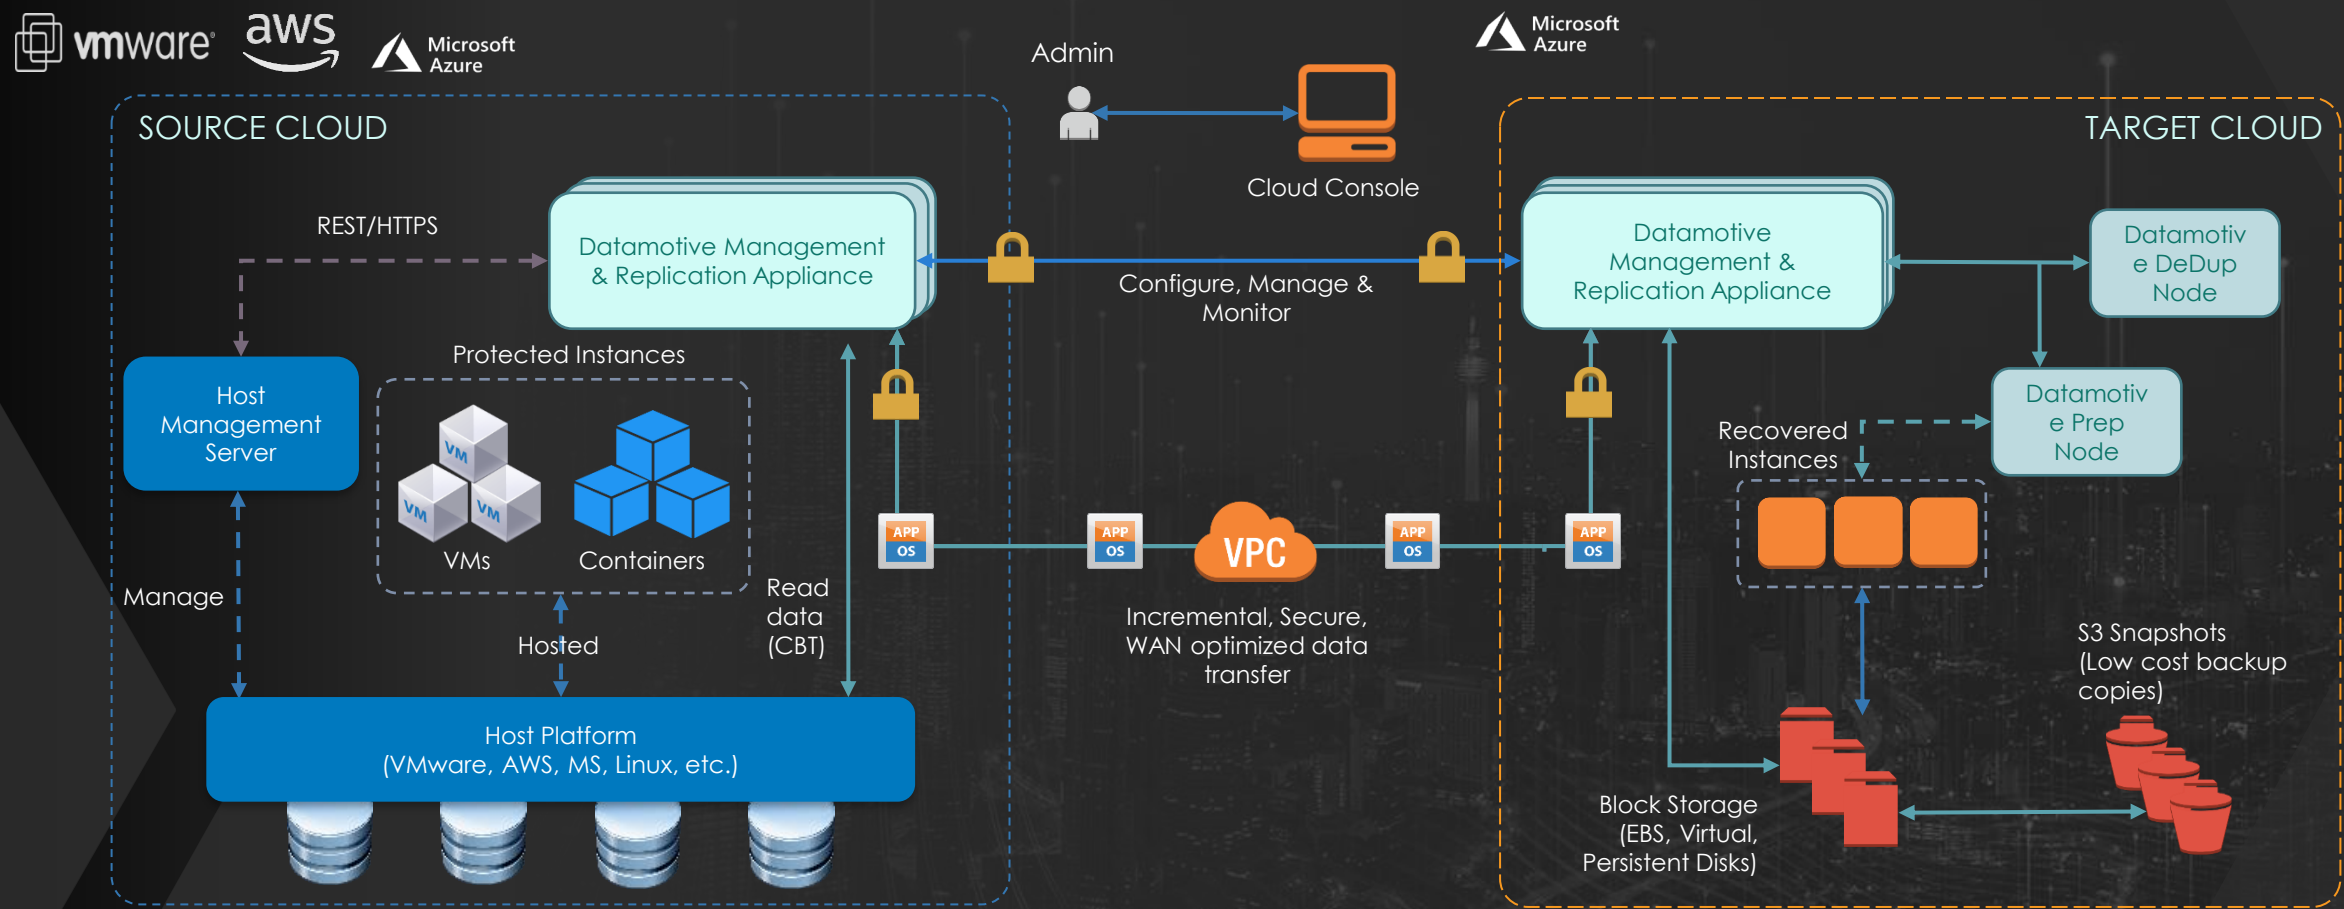

- Software only solution, aligned with all required security validations like CIS images, NSA compliant replication, private IP and SSL based communication etc.

DATAMOTIVE
Unlock the hybrid, multi-cloud
