

Docketry is an Al powered Intelligent Document Processing (IDP) solution that is designed to streamline business operations. It helps you process large volumes of data quickly and accurately.

It is built to meet the needs of multiple businesses sectors including - Insurance, Healthcare, Banking, Logistics, and more. It provides you with the tools designed to enhance the efficiency of business operations.

It can be seamlessly integrated to your existing systems to achieve the STP (Straight-Through Processing). The product leverages Artificial Intelligence (AI) and Machine Learning (ML) to automate data processing tasks, eliminate errors, increase productivity, and enable businesses to focus on their core competencies.

Docketry Features

Docketry comes with a range of features and benefits that can help your business stay ahead of the competition.

Automated Data Entry

Automates data entry tasks, freeing up valuable resources for businesses to focus on their core competencies.

Intelligent Data Extraction

Docketry uses advanced AI/ML techniques to extract data from complex and multi-page documents and forms.

Real-Time Processing

Helps to process real-time data, allowing you to make quick decisions based on up-to-date information.

Error Reduction

Helps in reducing errors and inconsistencies in data processing and provides improved accuracy and efficiency. The product is not template driven providing better results.

Integration with Existing • Systems

It is designed to work seamlessly with your existing systems, making it easy to integrate into your current workflow.

Customizable

Docketry is highly customizable and can be tailored to meet the specific needs of individual businesses.

Improved Accuracy and Efficiency

Docketry streamlines data processing tasks and reduces errors, resulting in improved efficiency.

Enhance Customer Support

Enables businesses to process data quickly and accurately, resulting in improved customer service.

Cost Savings

By automating data processing tasks, businesses can save on costs and improve business ROI.

Data Compliance

Docketry ensures enhanced security and compliance measures for sensitive data.

According to a recent study,

the global intelligent data processing market is expected to grow at a CAGR of 29.7% from 2022 to 2030, driven by the increasing demand for automation and digitalization in various industries, including insurance, Healthcare, banking, and logistics.

Think Documents.
Think Docketry.

Insurance

Docketry can help insurance companies to manage claims processing, KYC processing, invoice processing, and data processing to automate and streamline their operations. 70% of insurance claims contain errors due to manual data processing.

Banking

Our solution can help banks with KYC processing, invoice processing, and extracting data from complex and multi-page documents faster. 75%-80% of banks believe that automation can help them to reduce costs.

Logistics

Docketry can help logistics companies process orders, inventory forms, invoices, insurance documents, and extract data faster. By automating invoice processing tasks, logistics companies can reduce processing times by up to 90%.

Healthcare

Docketry can help healthcare providers process their patient forms, insurance documents, financial and KYC documents and test reports and others accurately. It minimizes human error, reduces cost, and can improve patient/provider satisfaction.
