

Simplify data collection, boost patient care

A state-of-the-art platform for all digital medical forms, questionnaires and measurements in a library. Seamlessly integrated into your own healthcare information system

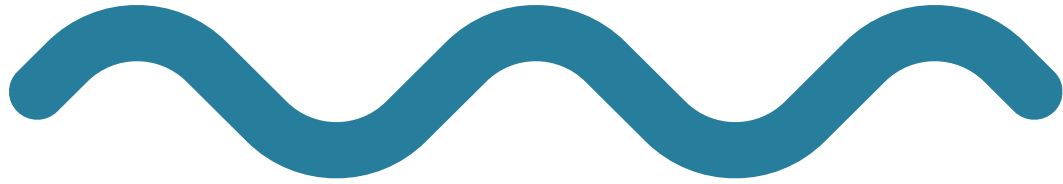

Open Health Hub for Healthcare Managers

Streamline the healthcare process with digital medical forms

A streamlined approach that reduces administrative burdens, minimises the risk of errors, and saves valuable time. And which can be realised [within a few weeks](#).

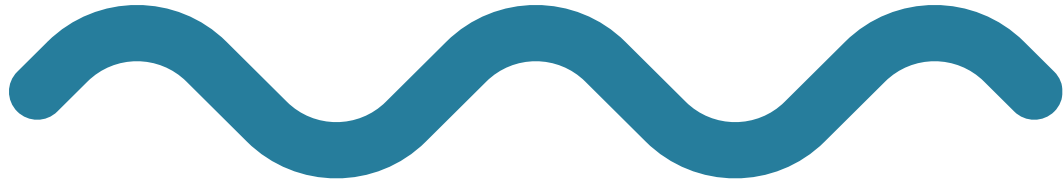

Open Health Hub for Healthcare Professionals

Optimise your patient engagement

A reliable solution that saves you **valuable time** and reduces your administrative burdens. Leaving more time for a meaningful conversation during the actual consultation.

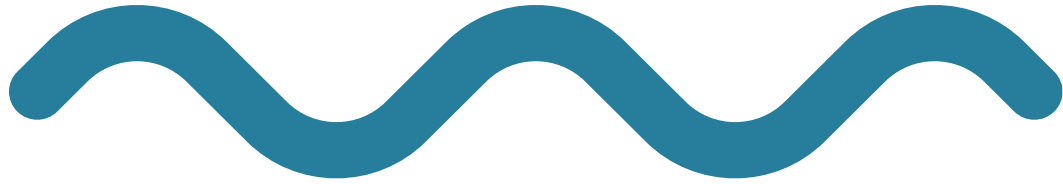

Open Health Hub for Clinical Researchers

Simplify your research with digital medical forms

A high response rate, complete answers, and clear insight into the data you've collected: those are [crucial elements for successful research](#).

Open Health Hub for IT Professionals

One seamlessly integrated platform for all digital medical forms

One platform for all digital medical forms and home measurements used within your organisation. Seamlessly integrated into your own healthcare information system through the use of FHIR and robust APIs. [Developed by a party that truly understands the healthcare IT landscape](#)

Revolutionise healthcare providers' workflow

By offering a solution for digital medical forms and home measurement, you help healthcare providers reclaim precious time during consultations.

Design

Healthcare providers can design, plan and share their own digital medical questionnaires. Quick and easy, with standardised and validated questionnaires, and convenient templates for custom forms.

Collect

Patients fill out the online questionnaire at home. Simple and secure. End-to-end encryption guarantees that only patients and healthcare providers can access the data.

View

The collected data can be viewed in the EHR, directly accessible to the healthcare provider. This way, all information is clearly and conveniently displayed together.

Design digital medical forms quickly and easily

Save time | Get started right away with the content from our library or add content yourself.

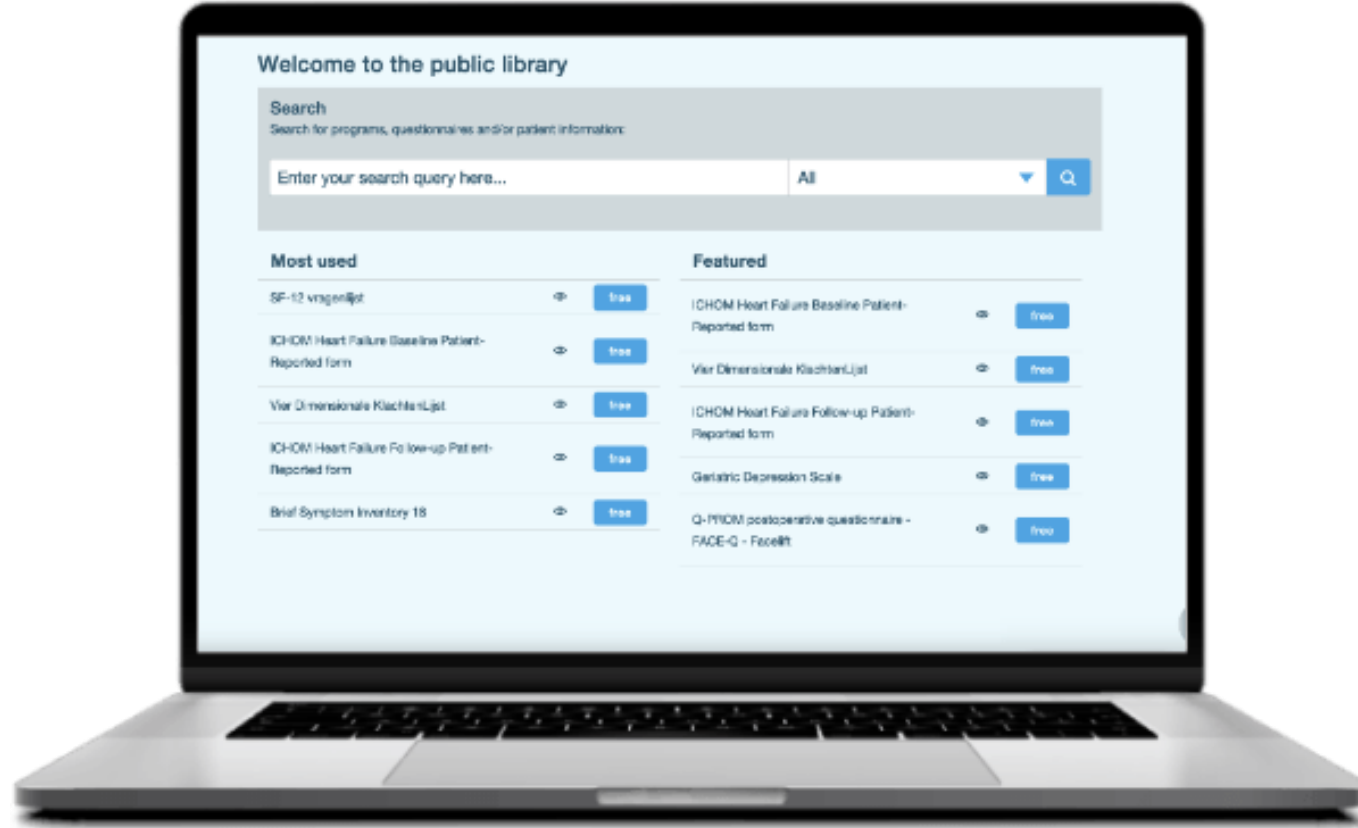

Streamlined collaboration | Efficient collaboration among healthcare professionals or coworkers. Team members can easily share medical forms and questionnaires.

User-friendly design | Our platform can be used white-labeled, ensuring user-friendly and visually appealing content, optimising the overall user experience for patients or participants.

Flexibility | Varied question types enable comprehensive data collection for analysis. Design medical forms your way. Our Designer offers a wide range of question types for extensive patient data collection.

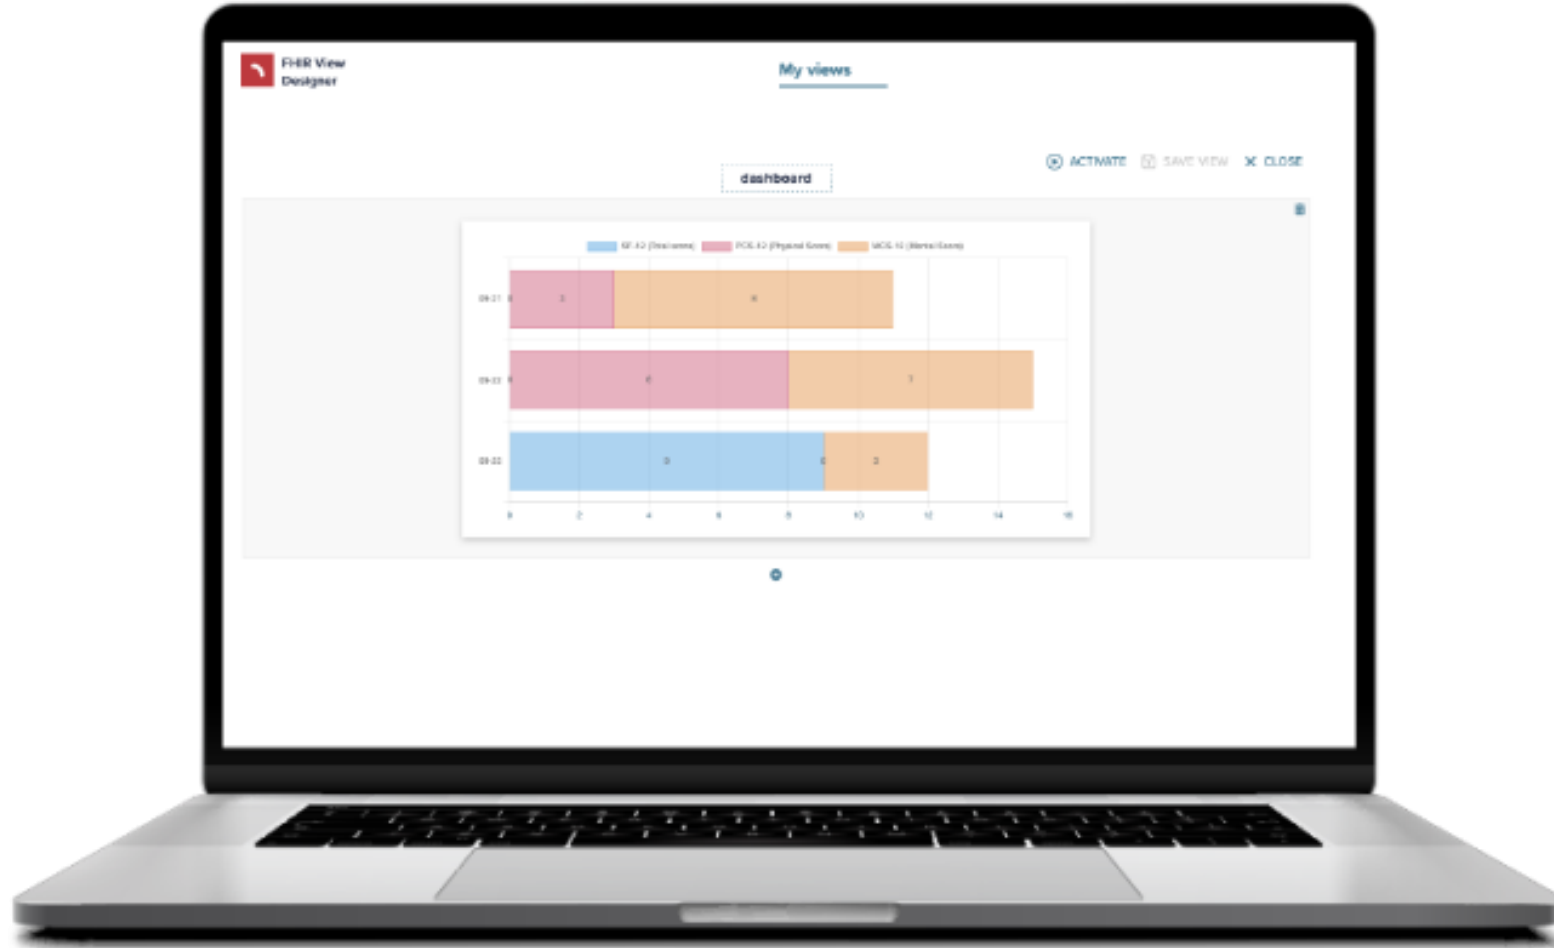

Design | 400+ validated medical forms

Design | Easily create custom content

Design | FHIR medical Dashboard

Collect digital medical forms quickly and easily

Secure | End-to-end encryption ensures that patient data is kept secure and private

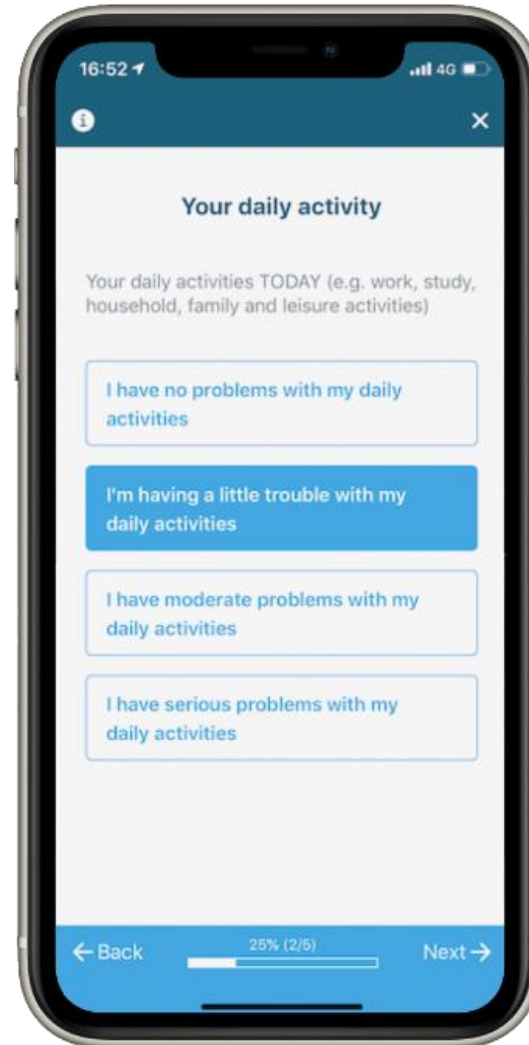

Efficiency | Streamline data collection, patients can enter their data directly through our app of the healthcare provider's own applications.

Interoperability | Integration with existing systems ensures that patient data seamlessly flows into the healthcare provider's EHR or other healthcare information systems

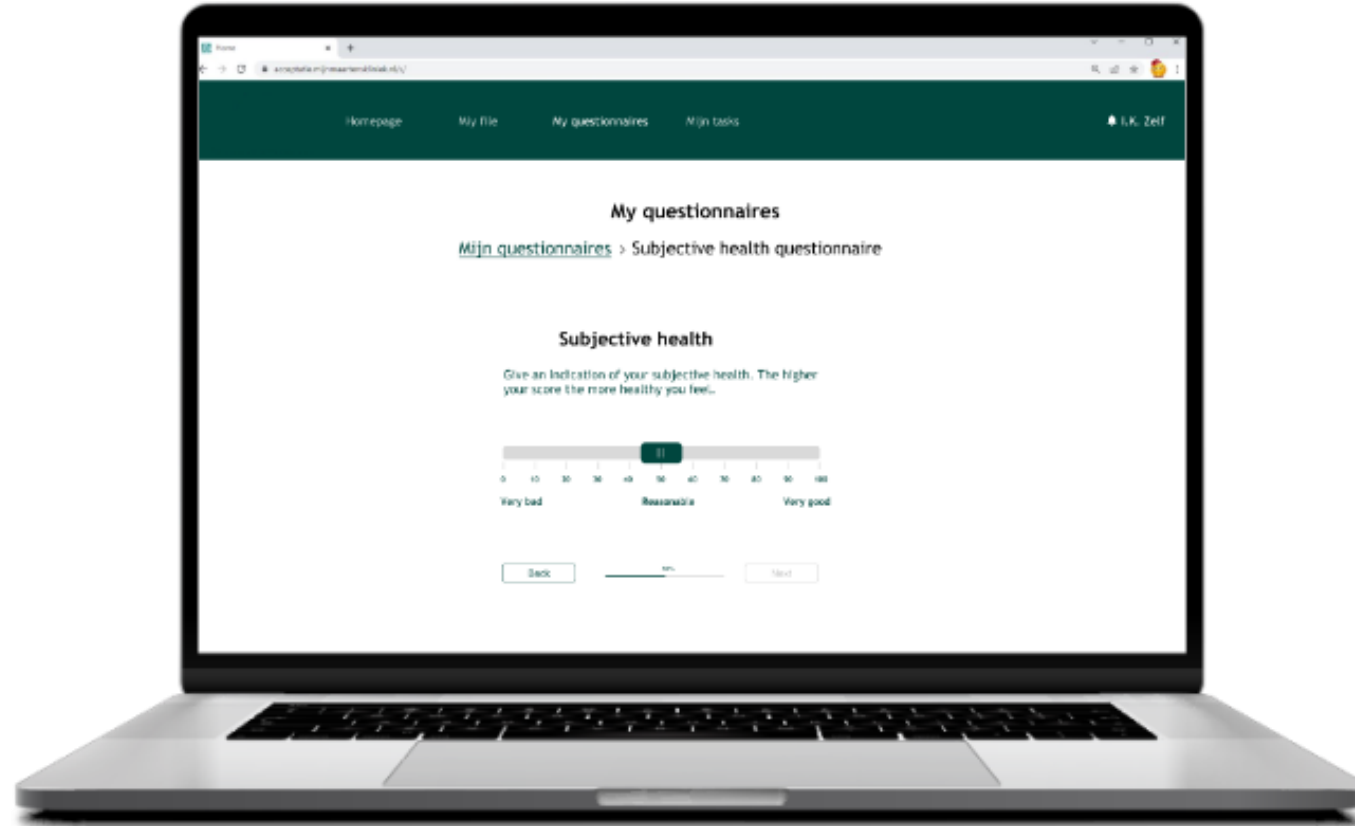

Improved preparation for consultations | Patients have the opportunity to prepare for consultations by providing relevant information and data in advance

Collect | Improve app and website

Collect | Web & Mobile SDK

Collect | Flexibility through FHIR API's

View collected patient data directly on your own screen

Comprehensive overview | The Viewer provides a comprehensive overview of patient-generated data, making it easier to assess trends, identify anomalies, and track progress over time

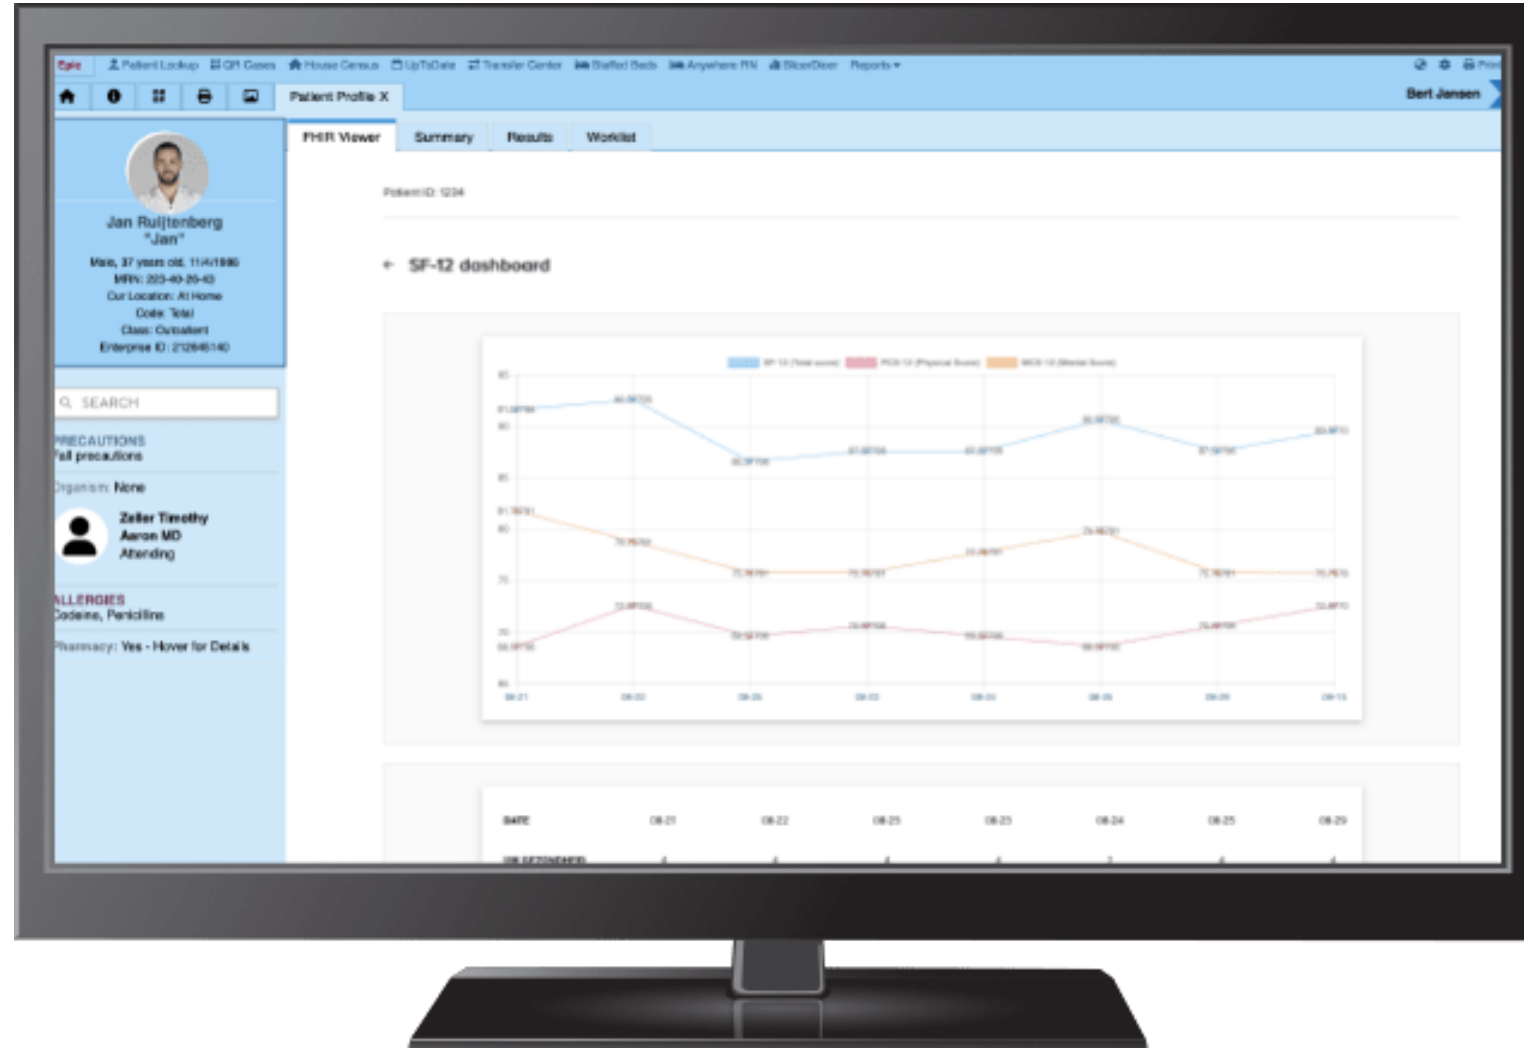

Customisation | Healthcare professionals have the flexibility to create their own custom views, tailoring the data presentation to their specific needs and preferences

Reduced IT Burden | Simplified IT integration eases IT workload, enabling prioritisation of patient care over tech setup

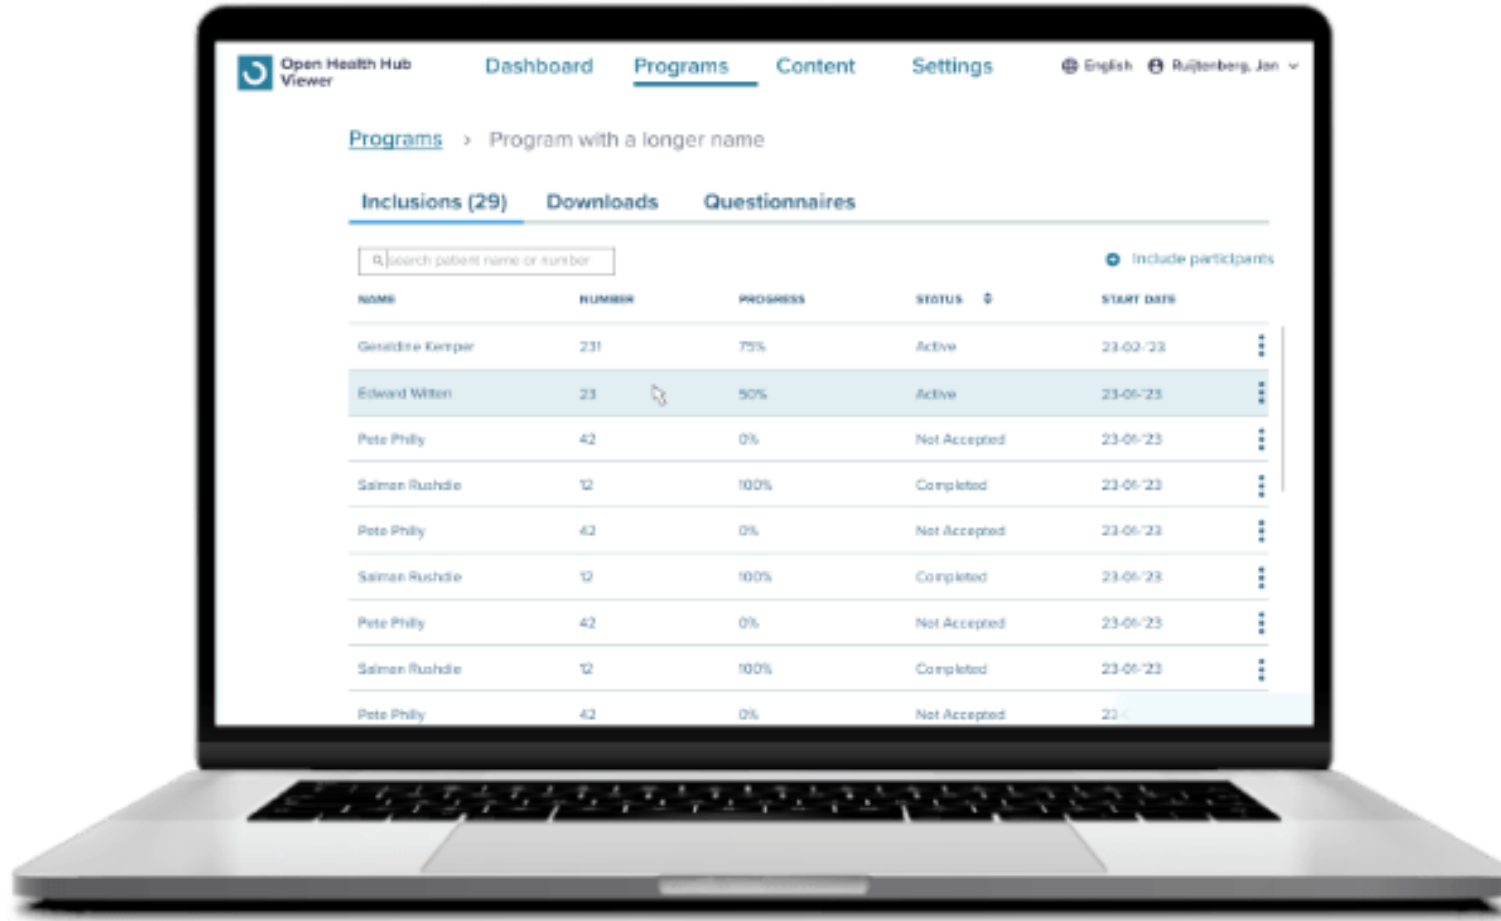

Interoperability | Integration with FHIR standards ensures interoperability with a wide range of healthcare applications and systems

View | FHIR Viewer

View | Standalone Viewer

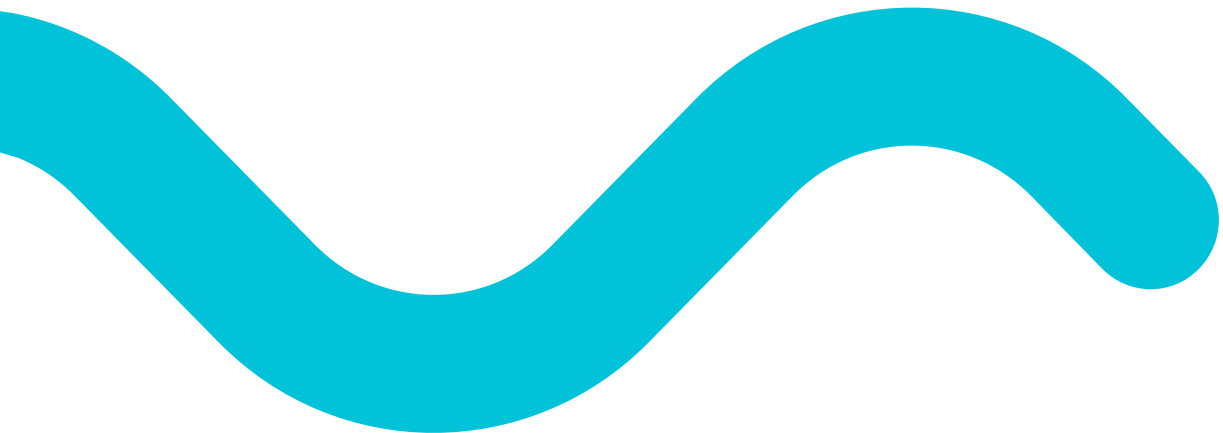

View | FHIR API's

**We'd love to show you
just how good it is**

It's Demo Time

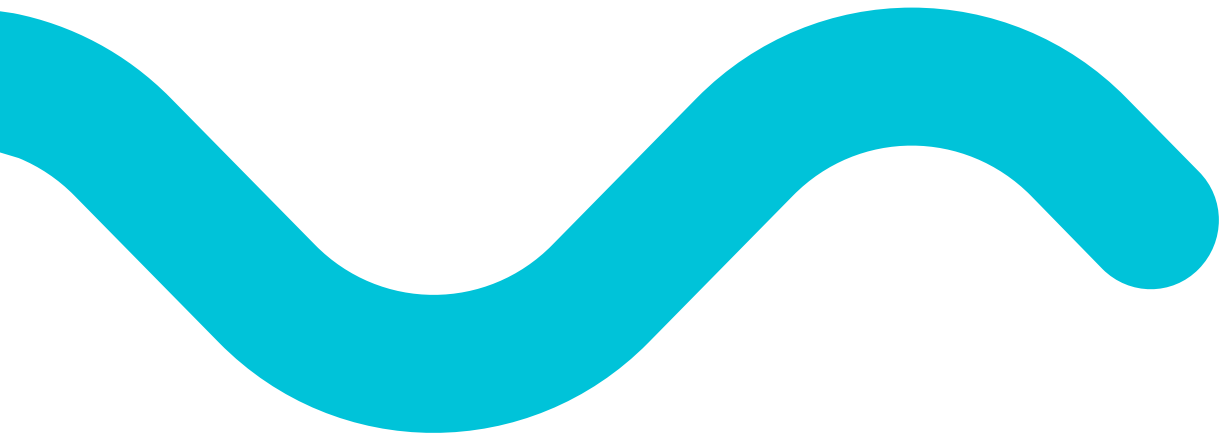

“By filling out the questionnaire, the patient is well prepared for the appointment. Also, we get a complete picture of the patient in advance.”

Sander Steijns

Nurse Specialist MUMC+

“In no way should a medical questionnaire ever be visible to anyone else. That privacy is completely watertight at Open Health Hub.”

Meindert Sosef

Surgeon, Zuyderland

Get started right away

A fast and user-friendly solution. Without it becoming a complicated IT project. Within a few weeks, you can start using your first digital form.

Start now and immediately benefit from time savings, cost reductions and increased satisfaction among your healthcare staff and patients. And as a next step, integration with your existing systems is easy and fast, through smooth connections based on international standards – such as FHIR – and solid APIs.

Implementation

Our employees and implementation guide ensure a fast and care-free implementation. You can be up-and-running in 3 weeks.

Steps

1. IT alignment

Goals

Ensuring a good fit between your existing systems and our platform for a seamless user experience

2. Content alignment

Ensuring all relevant questionnaires and forms are available for users

3. Implementation, testing and training

Implementing our platform with your team, test the final implementation and train employees

4. Management after go-live

Ensuring your employees know how to get the most value out of our system

No matter your size, we'll find the right price

Whether you're a small clinic, a large hospital, or anything in between, we have pricing plans that will fit your organisation. Our commitment to transparency means you'll always know exactly what you're getting and how much it costs.
