

# Microsoft 365 Copilot Envisioning Workshop

## Discover and unlock the value Copilot can bring to your business

Copilot has unlocked a new frontier in productivity. In today's dynamic business environment, organizations are eager to harness the power of AI to enhance their operations. However, achieving positive results with new capabilities like Microsoft 365 Copilot is not solely reliant on technical implementation. It demands careful planning, preparations, and readiness to deliver the promised gains without escalating associated security risks. Click2Cloud assists you in organizing for success with Microsoft 365 Copilot.

### A Readiness Workshop for Microsoft 365 Copilot can help you achieve:

- Agility
- Accelerated Innovation
- Elevated Productivity

### What you can expect

The Envisioning Workshop is delivered over one day and provides:

- ✓ An overview of Microsoft 365 Copilot capabilities
- ✓ A review of technical requirements and what's needed to get your organization AI-ready.
- ✓ Identification & prioritization of business scenarios
- ✓ An overview assessment of your organization's current readiness
- ✓ A recommended roadmap & proposed next steps

### Duration

1 Day

### Workshop highlights:

- ▶ Discover the capabilities, use cases, and benefits of Microsoft 365 Copilot
- ▶ Gain a comprehensive understanding of your readiness
- ▶ Know the steps you need to take to prepare for Microsoft 365 Copilot
- ▶ Receive a customized success plan and roadmap
