IT Security & Defense

Leveraging the Power of AI for your Organization's Cybersecurity

With the increasing speed, scale, and sophistication of cyberattacks a new approach to security is needed.

Built on the principles of Zero Trust, Microsoft's new generative AI solution, Microsoft Copilot for Security will be a game changer, shifting the digital threat landscape back in favor of your organization's security team.

Benefits of our workshop:

Get an extensive introduction to Microsoft's Copilot for Security and the potential of generative AI for your organization.

Discover the different personas and their needs when working with Microsoft Copilot for Security.

Learn the right way to prompt to use Microsoft's latest security solution in an efficient and cost-effective way.
