Cloud Security Has Become More Costly Yet Remains Ineffective

In today's digital age, businesses face a never-ending barrage of threats. With ever-increasing scrutiny from regulators and the public, the challenge intensifies.

Ironically, only the expenditure for solutions has kept pace, not the overall effectiveness.

Imagine a solution that makes your cloud network impermeable to external threats and it greatly reduces cost.

The Solution Is SDi.

In a world where the resilience of your cloud network directly impacts your bottom line, yet threats and costs are spiraling out of control, Bastionne's Secure Digital Interaction technology is your answer. This seamless, plug-and-play physical or virtual sovereign security gateway transforms disasters waiting to happen into peace of mind.

Supreme security, smartly budgeted.

Superior Sovereign

SDi is Zero-Trust centric and represents an amalgamation of core security technologies and principles, essential for comprehensive prevention of cloud threats. It is built with Bastionne's industry-leading Sovereign Identity Management technology, which enables the following capabilities in a single, powerful package:

PERIMETER
VPN

ENDPOINT
FIREWALL

MACHINE IDENTITY
MANAGEMENT

QUANTUM SECURE
GATEWAY

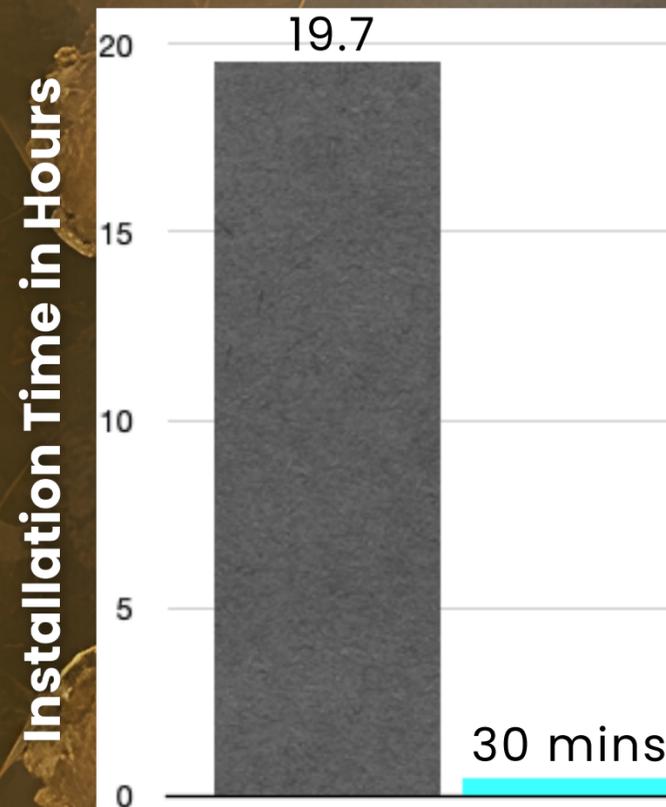

SECURE ACCESS
SERVICE EDGE

SINGLE
SIGN-ON

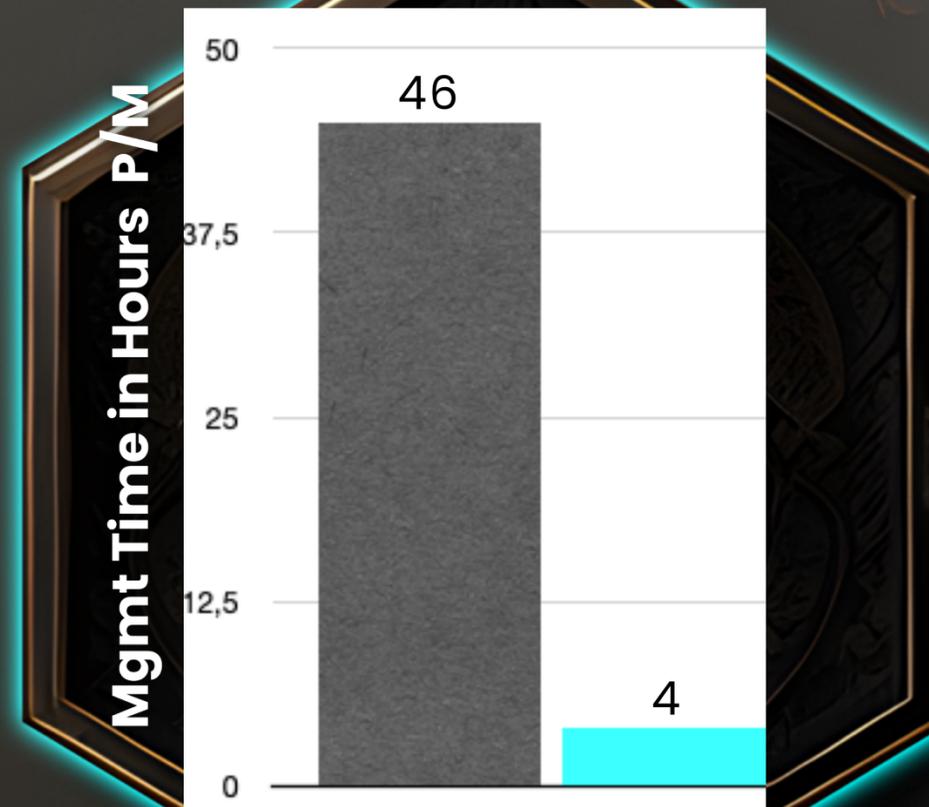

Preeminent and Practical

□ Everything Else

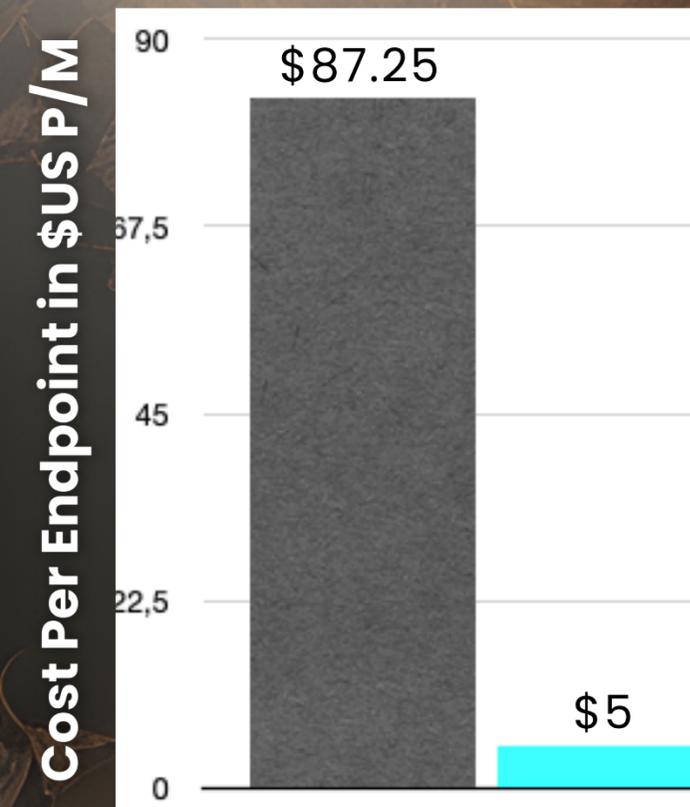

■ Bastionne SDi

It takes only 30 minutes to install.

Requires merely 4 hours of management a month.

And it costs just \$5 a month per endpoint.

SDi, with its autonomous and comprehensive design, greatly simplifies your security architecture while significantly reducing overall expenses. Rather than relying on multiple tools, achieve more with just one.

Revolution Beckons

Join Bastionne and lead the march toward a secure future. Secure your legacy, prevent security failures, and ensure trust.

Sovereign Machine Identity Management
for critical operations and assets.
