

FLEXIBLE BUSINESS PARTNER INTEGRATION WITH EDI-ZONE

FOR DIGITIZED INTERCOMPANY PROCESSES

Core industries for EDI-ZONE:

- + Automotive
- + Consumer Products
- + Wholesale/Retail
- + Public Sector

Exchange business data automatically and paperless in the form of standardized messages via EDI. EDI-ZONE transfers your data error-free into the target format, so that they can be transmitted to your business partners without complications. In this way, you not only meet the requirements of your customers. You optimize your internal processes, save costs and reduce manual effort. In addition, you create the prerequisite for participation in supplier networks with an electronic data exchange.

Seamless ERP integration

- Tight process integration and perfectly harmonized message conversions
- High transparency and usability by linking EDI messages to the corresponding ERP document in the document flow

Use of standards

- Support of all EDI standards such as EDIFACT, VDA, ANSI and many other formats
- Qualified industry-specific versions
- Completely based on common standards like XSLT, Fiori and ABAP

Fast implementation

- Pre-defined scenarios and plug & play EDI processes
- Extensive mapping library with consumable out-of-the-box mappings
- High flexibility through easy creation/adaption of mappings

EDI stands for "Electronic Data Interchange" and is the ideal way to digitization. You can rely on data structures, protocols and systems that have been established for many years. Through EDI-ZONE, technology competence is combined with industry and process expertise, and we focus on process optimization and seamless ERP integration.

YOUR SOLUTION BENEFITS

Security of investment

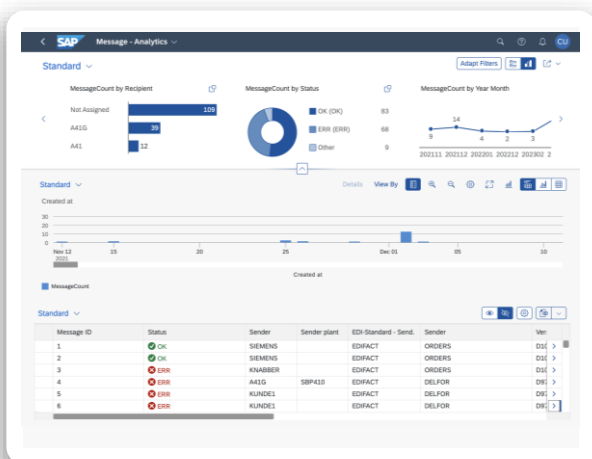

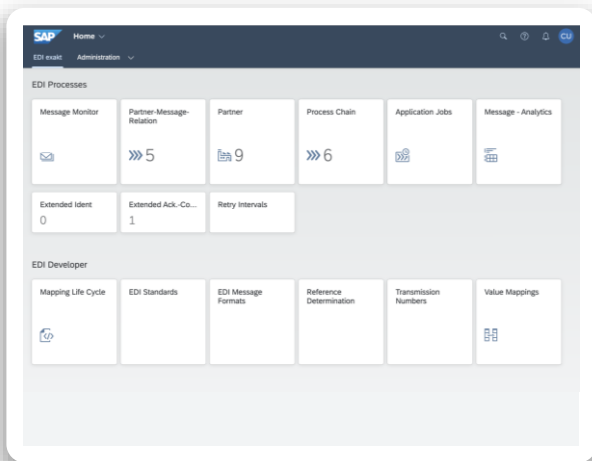

- Solution on latest technological standard
- Developed and operated on SAP Business Technology Platform
- Flexible use with on-premise or cloud ERP solutions as well as other solutions
- Qualified SAP Industry Cloud Solution

Smooth operations

- Self-controlling electronic data exchange
- Fast detection of anomalies in data exchange in processes and possibility of direct interaction by users
- No cumbersome technical processing by IT required and less information loss due to fewer interfaces in the company

Security

- Integration of EDI-ZONE into the SAP authorization concept
- Restriction of access to EDI by administrators

INTUITIVE - TRANSPARENT - EFFICIENT

By using EDI-ZONE, you can digitize the following use cases, for example:

- You issue your orders to your suppliers without delay and can change them subsequently.
- You provide your supplier with corresponding stock overview, and he can react independently and optimally based on information about ranges of coverage, minimum and maximum stock levels.
- Customers provide you with orders directly
- Scheduling agreement releases are fully stored in the ERP and their content can optionally be verified.
- Send customer invoices electronically.
- Receive digital incoming invoices and payments via EDI.

With EDI-ZONE you achieve:

- Up to 100% time savings by eliminating previously manual, frequent and time-consuming activities through EDI-processed transactions
- Shortening the duration of transactions from several days in the past to a few minutes today
- Elimination of time spent on troubleshooting due to the avoidance of errors
- Reduction in inventory levels due to faster order processing and shorter delivery times
- Shorter response and delivery times, resulting in higher customer satisfaction and better ratings
