Imagine you could predict what your visitors are going to BE or DO BEFORE it happens?

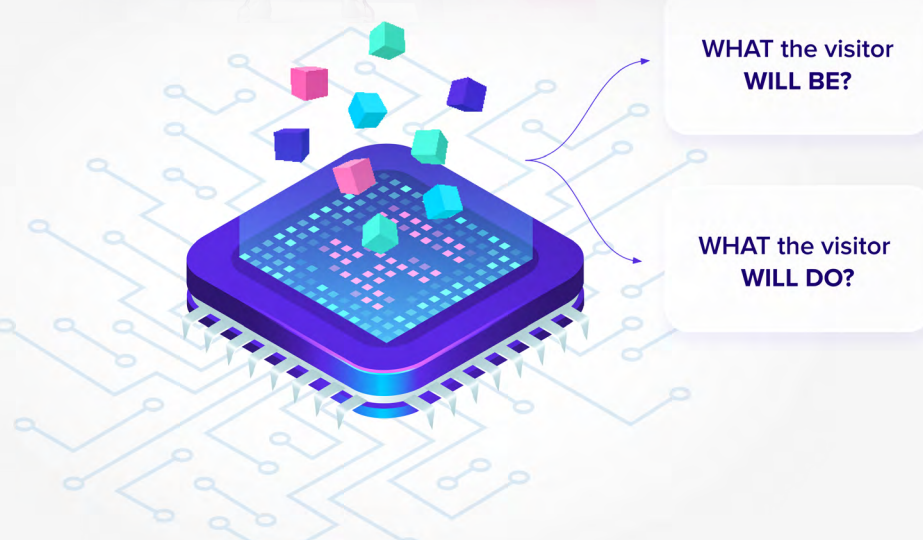

What Is Wandz.ai

Wandz.ai is an open Predictive AI platform that allows teams to collect in-session data on visitors and build real-time AI models predicting what they are going to be or do.

The Revolution of Wandz.ai

Wandz.ai changes the current paradigm and allows to predict future visitor intent before it becomes history and act on it in real-time.

50 Milliseconds

For any prediction model to return results

1 Hour Setup

From deployment until predictions are generated

On All Visitors

Including first-timers and non-logged-in

Pre-built

Ready-to-use models, adjustable to your needs

Wandz.ai empowers your teams with real-time AI, without the need to care about AI/ML infra and ops.

Gartner expects that by 2026, enterprises that have adopted AI engineering practices to build and manage adaptive AI systems will outperform their peers in the number and time it takes to operationalize artificial intelligence models by at least **25%**.

Wandz.ai technology is trusted by
