

MICROSOFT FABRIC: 20-DAY POC

This end-to-end, cloud-based SaaS solution for data and analytics is built on top of an open lakehouse (OneLake) and weaves several Microsoft tools together to streamline all data and analytics workflows. Throughout this engagement, our data experts will guide you from raw data to actionable insights, showcasing the robust capabilities and future possibilities regarding AI, Copilot, etc.

Crafting Your Path to Insight

Through close collaboration between our team of experts and yours, we will **jointly explore** how Fabric can enhance your organization's **analytics potential**.

Our proof-of-concept will be **tailored** to your organization's specific needs, and it will facilitate you to **develop** a long-term **vision** on analytics using the latest Azure data technologies.

Kohera's Approach:

- In-person kick-off: scope definition
- Workshop:
 - Define primary **objectives**
 - Pinpoint specific **use case**
 - Determine appropriate Microsoft Fabric **components**
 - Agree on **quantifiable** results
- Architectural analysis and set-up of a **roadmap**
- Throughout the development phase, relevant data will be extracted and transformed for reporting and analysis ensuring Microsoft's best practices
- Creation of a Power BI report providing **actionable insights**
- Final workshop:
 - Demo
 - Presentation
 - Price indication of an appropriate Fabric tier

Thanks to Kohera's POC you will gain insight into the potential added value of Microsoft Fabric for your entire organization.
