Market AI:

Cloud-Based Brand and Market Share Analytics Solution for Consumer Product Goods

Introduction

A cloud-hosted intelligent market share solution for SKU shelf share compliance and occupancy analytics.

It is a customizable solution to identify and calculate the share of the target brand's SKUs visibility on the shelf in a store against the competition.

A Cloud-Based Brand and Market Share Analytics Solution for Consumer Product Goods

Key platform features

Plug and Play solution to accelerate your vision-based market analysis needs at every store which brings off-the-shelf features like -

- Reusable feature store
- Reusable data models
- Prebuilt algorithms
- Scalable MLOps and APIs
- Narrative, storytelling, and visualizations
- Threshold-based escalations
- Prescriptive actionable alerts and auto reminders
- Role-based access control

Platform Highlights

Provides high performance and it is an easily deployable platform that enables the following.

- Effort 80% reduction in time in terms of customization
- Accuracy 85% baseline accuracy for all models
- Resource Start generating immediate value with 75% fewer data science resources.
- Feedback In-built feedback loop for automated re-training of models
- Architecture Multi-input deep learning model helps reduce the number of models in production by 95% thus decreasing infra cost by 40%
- Latency Kubernetes-based deployment for reduced latency.

Data Preparation

- Supports any kind of shelf image of SKUs across retail store categories
- Automated extraction of individual SKU's
- Image enhancement with Al/ML to improve extracted SKUs image quality
- Automated segregation of SKUs mapped to respective target brands

Training

- Automated Machine Learning for brand classification model(s) training
- Deep learning vision models
- Automatic model tuning to pick the best performing model
- Automated deployment of best model on cloud

Inference Pipeline

- Highly scalable inference endpoint and APIs
- Batch processing to handle large number of input images
- Report generation at various levels using spreadsheets (Image, Store, area etc.)

- Alert mechanism on completion
- Logging mechanism at every stage of process flow

Typical Use cases for Market Al- Win the primary shelf

Central Unified insights (near real-time) across global stores on brand positions

Determine competitive insights on brands for market push at the right time

Sales planning and targeted growth based on shelf availability of SKUs

Incentivize stores with lower shelf occupancy for target brands

Predictive alerts for revenue loss situations to brand managers, on stockout situations across global stores

Benefits

Visibility and transparency on brand positions globally

Reduce dependency on syndicated competitive analysis.

Improved SKU growth targets globally

Real-time version of truth for competitive market share penetration

Reduce stockout situations

Success Story

For a global CPG company, sales representatives visited numerous stores and measured shelf space manually to determine share on shelf for target brands. This was a time-consuming process and was prone to problems of error in data capturing, maintenance (as it required resources), effort, and long cycle time for data to turn into insights.

At LTIMindtree's automated market AI enabled clients to extract useful insights directly from the shelf images using image analytics. Shelf images are captured by sales representatives through mobile apps which are analyzed by backend algorithms and share the desired insights in a short time.

This has led to a considerable reduction in time spent by representatives in each outlet and provided actionable insights in near real-time, leading to faster decision-making.

Our solution also hosts a state-of-the-art self-supervised model which has enabled the customer to train them with lesser training data. The number of models required for different brands and their corresponding variants was reduced by using multi-input modeling approaches.

Key Statistics of solution at play

This application is used in 5K+ stores in India, Argentina, Colombia etc. for monitoring 10K+ SKUs, spanning across 6 categories like soap, shampoo, hair care, detergents etc., servicing 50 + key brands, for world's leading CPG companies.

If you're looking to unlock the potential of cloud-based brand and market share analytics, then LTIMindtree has you covered. Contact us today to find out more about how LTIMindtree can help you achieve maximum efficiency in your vision-based market analytics. To know about our capabilities and offerings visit our website-Data Analytics Services, Data Analytics Solutions - LTIMindtree

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700+ clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by nearly 90,000 talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — combines the industry-acclaimed strengths of erstwhile Larsen and Toubro Infotech and Mindtree in solving the most complex business challenges and delivering transformation at scale.
