ZONES™

Redefine Data Governance And Compliance With Zones' Microsoft Purview Workshop

The regulatory landscape is constantly evolving, and organizations face frequent challenges in meeting the requirements of changing standards and frameworks. Data breaches, inconsistent data quality, and evolving regulations underscore the need for strong governance and compliance strategies.

Introducing Microsoft Purview by Zones: A unified data governance service empowering organizations to effectively govern, safeguard, and oversee their complete data portfolio.

Leveraging the power of Purview as our platform, Zones Data governance ensures the quality, security, and lifecycle management of data, while compliance solutions guarantee adherence to a plethora of regulatory, industry, and internal standards.

Discover the capabilities of Microsoft Purview through a workshop designed to enhance data security and compliance while leveraging generative AI guided by Microsoft's dedication to responsible data governance. Uncover strategies to govern, protect, and manage data assets effectively across all applications, ensuring security and compliance.

Objective of the Workshop

The comprehensive Microsoft Purview workshop delves deeply into harnessing its full potential for effective data governance and compliance within the organization.

• Assess the needs of your business: Tailored, engaging sessions empower your team to harness Purview for robust data management

• Interactive Sessions: Interactive discussions ensure alignment with your organization's needs.

• Develop a solution plan for Implementation and Adoption: Benefit from a solution-focused approach for successful implementation and adoption beyond the workshop.

Expected Outcomes

Attain a Comprehensive Understanding of Microsoft Purview and develop Practical Implementation Designs

• Design and implement a tailored Data Governance Strategy

• Strengthen data security measures and ensure compliance with regulations

• Foster networking opportunities and encourage collaborative learning among participants

Redefine how organizations approach data management with Zones' Microsoft Purview
