RAPID PATH TO DIGITAL EXCELLENCE

SOFTSERVE'S APP MODERNIZATION PLATFORM

With SoftServe's Application Modernization Platform (SAMP) accelerator, our clients can:

- **Focus forward and keep building product instead of the platform**

- **Stay competitive, differentiate faster, and reduce time to market for new services and features**

- **Feel confident in the knowledge that the security standards at-scale are guaranteed**

- **Boost ROI with reduced application on-boarding time and enhanced operational efficiency**

PILOT'S APPROACH

1 Our team starts by reviewing your current solution to build a roadmap for SAMP Pilot implementation or report with a plan for enhancements and risk mitigation of the existing container platform.

2 Then, we examine application architecture, prioritize applications for modernization, and adapt applications for deployment in containers.
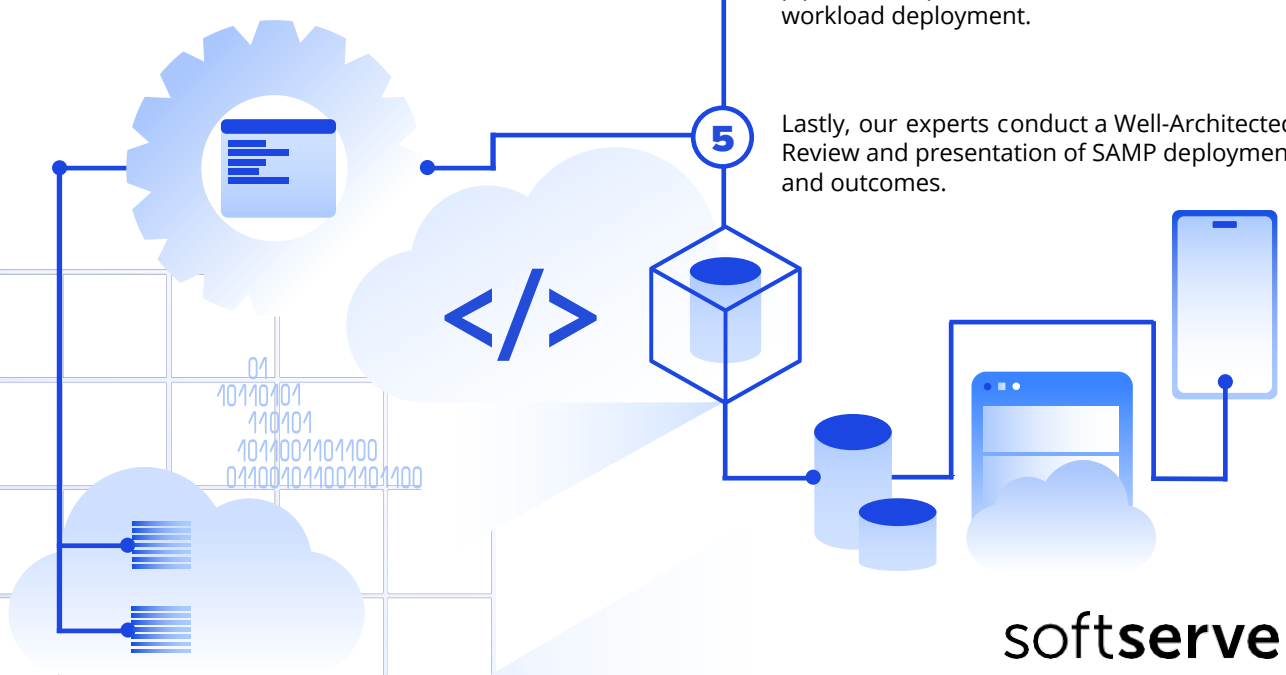

3 Next, we deploy the platform with Azure Kubernetes Service as a core component using the SAMP Pilot accelerator and utilizing IaC. After, we modernize and onboard one-to-tree applications to show how the platform can meet your needs and bring value.

4 After that, our team creates packages for containerized applications and sets up CI/CD pipelines for platform, container builds, and workload deployment.

5 Lastly, our experts conduct a Well-Architected Review and presentation of SAMP deployment and outcomes.

softserve

SOLUTION DELIVERABLES

The Pilot SoftServe's App Modernization Platform is fully described through IaC, including Azure Kubernetes Service add-ons.

Better cost controls, improved ROI, and reduced TCO

Modernized and running workload(s) on the platform, with CI/CD pipelines for the workload(s) deployment.

Up to 5x reduced Time-to-Market for new features and services

Budget:
$35-55K

Project timeline:
4-6 weeks

WHY SOFTSERVE

LONG-TERM MICROSOFT PARTNERSHIP

20+	3	250+	1000+
Years as a Microsoft Partner (since 2004)	Microsoft MVPs	Azure-certified professionals	Complex Azure projects delivered
