

IDENTIFY AND PREVENT THREATS

WITH eGROUP ENABLING TECHNOLOGIES AND A MICROSOFT SENTINEL ENGAGEMENT

As IT becomes more strategic, the importance of customized security strategy has become more necessary than ever. Security Information and Event Management (SIEM) solutions built for yesterday's environments struggle to keep pace with today's challenges—let alone tomorrow's unimagined risks.

Discover and stop threats before they cause harm with eGroup Enabling Technologies and a Microsoft Sentinel Engagement. Microsoft Sentinel, a fully cloud-native SIEM, delivers intelligent security analytics and threat intelligence across the enterprise, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

ASSESS

Understand the features and benefits of Microsoft Sentinel

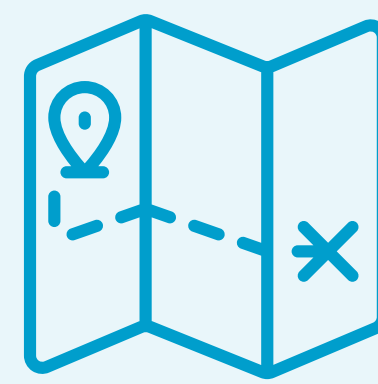

IDENTIFY

Gain visibility into threats across email, identity, and data

PRIOTIZE & MITIGATE

Better understand, prioritize, and mitigate potential threat vectors

DEFINE A ROADMAP

Create a defined deployment roadmap based on your environment and goals

DEVELOP A PLAN

Develop joint plans and next steps unique to your business needs

CUSTOMIZE THE ENGAGEMENT TO FIT YOUR NEEDS

Remote Monitoring

If your organization doesn't have its own Security Operations Center (SOC) or if you want to offload some monitoring tasks, we will demonstrate how eGroup | Enabling Technologies can perform remote monitoring and threat hunting for you.

Joint Threat Exploration

If your organization is interested in learning how to integrate Microsoft Sentinel in your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

Engage eGroup Enabling Technologies for an overview of Microsoft Sentinel along with insights on active threats to your Microsoft 365 Cloud and on-premises environments with a Microsoft Sentinel Engagement.
