# Revolutionize SecOps with Cognizant® Cyber Threat Defense

**Go beyond and take security operations to the next level with Cyber Threat Defense. Powered by Microsoft Sentinel, seamlessly fused with Microsoft Defender XDR and Security Copilot**

Cyber Threat Defense by Cognizant is designed to revolutionize how enterprises think about SecOps.  Threat intelligence, ITSM integration, Gen-AI powered investigations and knowledge and SOAR orchestration will allow you to stop threats in their tracks- before they damage your business

**This offering will help you defend against threats- at machine speed. Powered by Security Copilot. It includes:**

- Environment readiness assessment and gap closure
- Design and deployment or migration of SIEM and XDR capabilities
- Use case analysis and threat modelling

- Learn how Security Copilot works across Sentinel and Defender XDR to accelerate MTTR
- Fully managed operations in 24/7 SOC available
