Smart Rollout for Power Platform

Adopting Power Platform with the right first steps

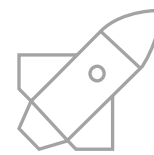

Low Code and High Productivity for rapidly changing business needs

Businesses need to really enable their portfolio and not solve just one business problem. The business problem became how to build a thousand apps at scale and not how to build one app.

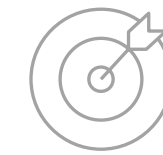

Primary challenges

- Does your business have an application backlog to solve operational challenges?
- Is IT skills & resources shortage preventing you from keeping up with the pace of the business?
- Do you need to integrate business data?

Ideal solution

- The objective of Smart Rollout is to help organizations that are interested in adopting Power Platform with the right first steps on their journey.
- Effectively manage the deployment and usage of Power Platform.

Desired outcomes

- Smart Rollout empowers businesses to unleash the full potential of the Power Platform while maintaining a secure and well-managed environment for users.
- Define what you need & get started with Low Code Development.

Smart Rollout features & benefits

Smart Rollout is not a long boring governance project, it's a fast engagement. We provide a structured and controlled approach to effectively manage the deployment and usage of Power Apps, Power BI and Power Automate.

Vision & Strategy

Define Objectives, Use Cases / Approaches, a Low Code Development Support Team & Licensing Strategy.

Diagnose & Improve

Evaluation of current security settings, configurations, and review of existing apps and flows.

Digital spaces for Low Code

Data Loss Prevention Strategy. Manage availability & AI features. Monitor and control user activities

Power Start for Power Platform

It includes setting up policies, guidelines, and security measures to ensure data compliance, data security, and maintain consistent standards across the organization's Power Platform initiatives.

Innovate and modernize processes

It enables you to build no-code apps and deploy them across every platform – from web to tablet to mobile

Showcase important data

Unify data from multiple sources to create immersive, interactive dashboards and reports that deliver actionable insights and improve business.

Automate repetitive tasks and processes

Automate and integrate business processes, approval workflows, notifications, and more.

We can help you build and deploy your solutions

Smart Rollout is a governance project with a fast engagement. Once the structure to manage your Power Platform solutions are in place, we recommend acting for Power BI, Power Automate and Power Apps.

▶ Pronto Apps

A working Power Apps for your particular use case. Quickly develop applications tailored to address unique and immediate business requirements.

▶ Pronto Dashboards

A working Power BI report for your particular use case. Quickly develop dashboards to make sense of your data and take data driven decisions.

▶ Pronto Flows

A working Power Automate Flow for your process. Quickly develop workflows that allow you to automate repetitive tasks and processes.

Implement and adopt Power Platform today
