# BLUEZONE

## EFFICIENT DOCUMENT OUTPUT MANAGEMENT IN SAP WITH **DOM-ZONE**

DIGITIZED AND AUTOMATED PROCESSES

Automating your document output management saves your employees in the sales, purchase, production, and service departments a lot of time – and thus your company a lot of money. In the SAP standard, all documents related to a transaction need to be manually searched and separately attached to an email. Using DOM-ZONE, the process of searching and compiling documents will be automated, making the document output management highly efficient. The integration of DocuSign® allows the usage of digitized, legally binding signatures and, thus, the digitization of quoting and approval processes.

#### Saving time and costs

Your employees cease to need search documents by hand and will save plenty of time, which they can use for more value-adding activities. In addition, the error rate is reduced substantially.

#### Full SAP-Integration

DOM-ZONE allows, for instance, mailing and printing of ERP-records as well as providing relevant documents in Sharepoint Online.

#### These departments benefit from DOM-ZONE:

- + Sales
- + Purchase Dept.
- + Service
- + Production
- + Construction
- + Quality Management

#### Scalability

DOM-ZONE is completely scalable and supports your growth: You can start in one plant/site or with one business transaction and roll-out the solution fully flexible according to your needs.

"Compiling, sending and printing document packages related to business transactions – our solution makes all this easy and smooth!"

Roswitha Siewe, Senior Director Business Development, blue-zone GmbH

### MANY DEPARTMENTS WILL BENEFIT:

#### Sales:

Find and send all documents related to a business transaction via a pre-configured emails – including the possibility to sign with DocuSign®.

#### **Purchasing Dept.:**

All documents belonging to an order can be found, modified (stamp, format changes, ), and put-out automatically.

#### **Production:**

All documents related to a production order are found automatically and can be send by one click..

#### Service:

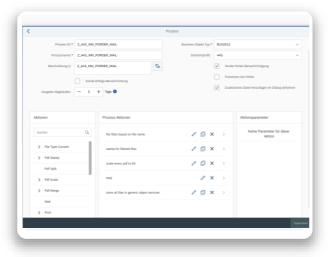

Maintenance plans, documentations, and manuals can be provided automatized out of the SAP system.

#### **Construction:**

Sharing of CAD models and CAD drawings, drawings in neutral format.

#### **Quality Management:**

Finding and sending of certificates, inspection documents, and reports.

#### DOM-ZONE WORKS EFFICIENTLY

According to rules defined by you, DOM-ZONE automatically finds documents related to a business transaction and processes them (scaling, stamping, converting to PDF, ...). Your document output management will speed up substantially. Due to the automated archival storage of mailing reports a maximum level of process reliability and transparency is guaranteed.

Corresponding email addresses and predefined email templates are automatically selected. All you have to do is click "send". Accordingly, you can automate the printing of all documents related to a specific purchasing or production order – regardless whether these are technical drawings or assembly instructions. Finally you can provide all such documents in Sharepoint Online as well, compiling all relevant information in one place.

#### GET THE MAXIMUM OUT

- A reduced error rate as well an enormous saving of time for employees concerned, as many repetitive, manual tasks will cease to exist
- A much quicker document output management (mailing, printing, ...) and, thus, a faster communication with customers and suppliers
- A digitization of the quotation process due to the integration of DocuSign®
- A paperless production by using Sharepoint Online
