OkTik

The Digital Workplace. Reimagined.

OneTik

Single-Touch. Automated. Delivered.

OkTik's OneTik Platform Automates the Post-Merger Digital Integration Process

About OkTik and the OneTik Platform:

Digital systems integration is critical to the success of any merger or acquisition. OkTik has transformed M&A by automating the enterprise-scale systems integration process – our "one-click" OneTik automation platform increases the speed of the transition, lowering costs and reducing risk.

What we offer

OneTik is a *comprehensive* Workplace Migration Platform. Proven in large M&A projects to drive rapid productivity benefits, it is not a narrowly focused technical migration tool, but an enterprise-spanning automated user journey. Built on over a decade of OkTik experience of delivering cloud-based enterprise workplace transitions, OneTik is powered by Microsoft Azure to deliver migrations remotely/securely with rapid integration into Microsoft Tenants. OneTik remotely surveys the enterprise user technical environment, then – using automation to reduce costs – migrates all data to the target environment with minimal disruption to users while delivering clear project/cost control to managers.

What our customers are saying

"To deliver complex change, you need to work effectively with third parties; OkTik truly integrate with us, creating a one team spirit focused on solutions."

Neil Charlton, Director of Technology Solution Delivery

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
