

# Eliminate chaos and increase output with an enterprise system of management for work

While most work today is inherently cross-functional, it turns out that working well across organizational boundaries doesn't happen automatically. But it's essential for success. In fact, organizations that manage cross-functional work well realize the following benefits:

- **98%** on-time delivery rate
- **95%** less time on manual data entry
- **30%** increase in project capacity
- **40%** reduction in errors

## Art of the Possible

Capabilities

- 1** Break down silos by centralizing all enterprise work in a single source of truth.
- 2** Eliminate manual steps and human error by automating work processes.
- 3** Provide robust collaboration and review and approval capabilities.
- 4** Deliver comprehensive reporting for data-driven decision making.

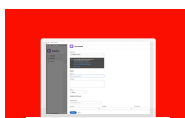

## Value

### Enterprise Scale

Workfront can meet your needs today and into the future as your needs grow and mature—and as cross-functional work leads to a greater need for centralized intake and visibility and shared collaboration tools.
