

# SII POWER PLATFORM

No-code solutions

Sii Power Platform no-code solutions are a force that enable enterprises to digitise faster and processes. They make it easier for firms to adapt to change, decide on new solutions more quickly, and innovate tools and new solutions and innovate tools and processes that will give them a competitive competitive advantage in the future, faster and better.

Enterprises are striving for greater by investing in digital tools for their employees. This will increase efficiency, eliminate repetitive, unproductive tasks and increase productivity. Work that can be accessed from anywhere, both stationary and mobile.

Our Sii Power Platform no-code solutions gives you the comprehensive solution. We will create an environment for your business- from an audit to advising on the best solutions and how to manage and administer such tools. While maintaining full data security. We will also provide you with detailed information on the environment to be used, and together we will develop rules to prevent data loss.

We show you how to manage data integration and analysis. Everything to unlock maximum value based on Microsoft tool on your regular daily basis.

As an experienced Partner of Microsoft (Competency Star 2023), we know how to use the potential of the Power Platform tools.

Sii Power Platform no-code solutions are tailored to the unique requirements, the possibilities and examples grow sky-high, it all depends on your needs:

- **For example:** Mobile Apps, Data reporting, workflow automation, employee onboarding, project management, inventory management, expense tracking, health and safety compliance, CRM.

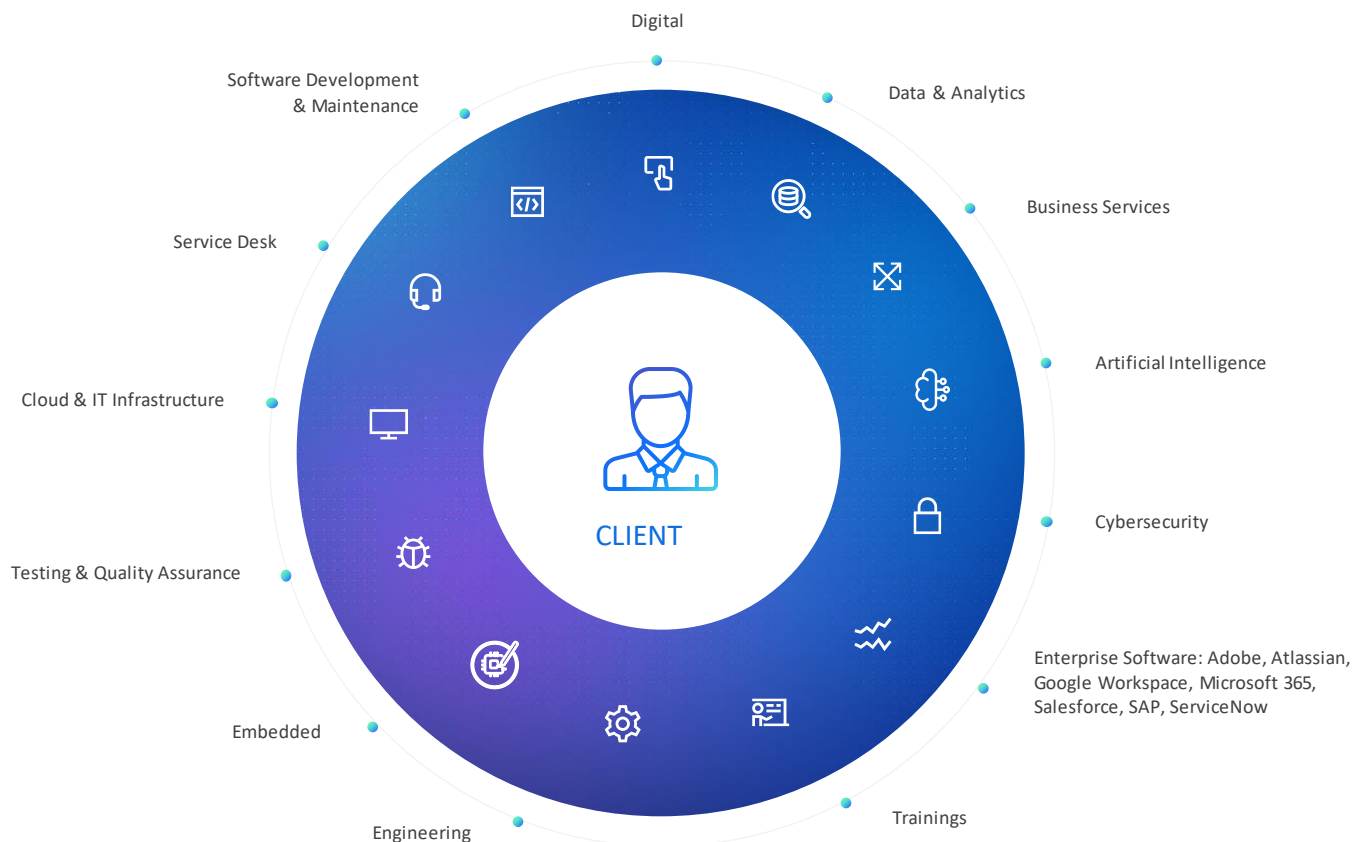

Using the no-code tools of the Microsoft Power Platform, we will launch a new era of change in your company, based on a change management policy, to create innovative no-code solutions with full employee involvement

## Benefits:

- **Save time**  
Any authorized member of the organization can program the application themselves without having to wait.
- **Increase productivity**  
Developers will focus on more complex applications which already require more knowledge of programming code.
- **Reduce costs**  
Business or operational staff who know exactly how things work, can perform the steps themselves without having to explain them to more technical specialists.
- **Speed up operations**  
Rapid application development, helps companies respond more quickly to market business opportunities more quickly.
