

AZURE FINOPS

Control your cloud costs with proven methodology

Maintaining cloud solutions requires constant control of procedures, security, and costs

Maintaining cloud solutions necessitates ongoing oversight of procedures, security protocols, and expenditure. Virtually every implementation undergoes evolution; adjustments in service scale, integration of new components, and modifications are routine. The cloud often serves as a realm for experimentation, fostering innovation. However, these endeavors generate cumulative resources that may slip beyond our oversight - resources that become orphaned or overvalued.

Enter FinOps, a methodology tailored to empower organizations in managing cloud expenditures effectively. FinOps unites engineering, business, and finance departments to furnish enhanced oversight and comprehension of costs. Moreover, it facilitates informed decision-making regarding cloud investments, optimizing business returns.

We will provide you with knowledge in the field of:

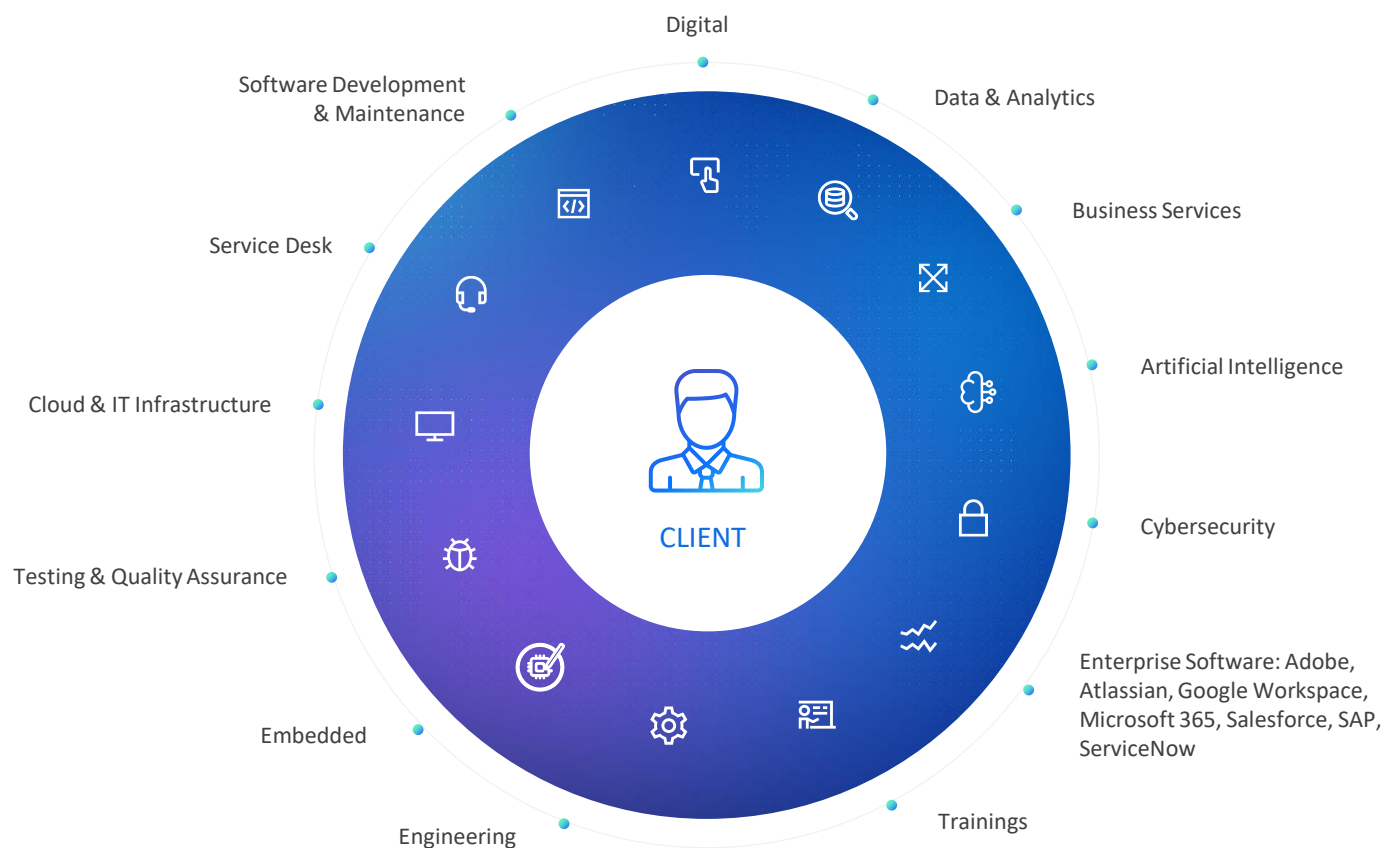

- Analyzing and monitoring cloud expenditure.
- Tracking service performance and forecasting costs.
- Managing anomalies effectively.
- Optimizing cloud usage for both cost and service efficiency.
- Identifying opportunities for savings.
- Allocating costs to specific teams, projects, or products.
- We will assist in implementing control and cost optimization tools within your cloud environment and provide our best practices to support your endeavors.

Why our clients decide on our help

- They choose us for enhanced expenditure control, optimizing costs.
- Because we identify and eliminate unnecessary resources, reducing overpayments.
- They opt for us to improve efficiency in their cloud investments.
- Because we provide an enhanced understanding of cost structure and expenditures.
- They choose us for the integration of technical, business, and financial departments in management.

Offer – One-stop shop

Tangible Benefits / Desired Outcomes

- ✓ You take care of your business development - we take care of the cloud
- ✓ Our architects will support you in the latest technologies
- ✓ We are ready to maintain your infrastructure with dedicated support team

Microsoft Cloud

Why Sii

600 certified experts

Solution Architects, Network Engineers, Security Engineers, DevOps Architects, Data Engineers, Azure Administrators, Azure Developer, Cybersecurity Architects, D365 Consultants, Power BI Analysts

Leading cloud services

Microsoft Azure, Microsoft 365, Dynamics 365, Power Platform

Innovative industry solutions

For manufacturing banking, healthcare, real estate and public sectors

End-to-end Project Support

Mrom preliminary data analysis, target model creation, implementation on dedicated devices to maintenance
