

Neta Open Suite Energy Community: The IT solution to support the energy transition for companies, families and local Authority

About Engineering/ Neta Open Suite:

Engineering Group is the Digital Transformation Company, leader in Italy and expanding its global footprint. In the Energy&Utilities market it covers “meter to cash” chain and it has leading products for CIS and MDM market. Eni, E.ON are primary customers in Italy

What we offer

An IT Solution composed by mobile app and web application that: simplifies data entry for PODs already present as utility customers favored by integration with external systems; manages withdrawal curves that can be customized and derived from external consumption information (SII consumption portal); performs consumption simulation based on historical data of each individual POD recovered from metering systems possibly in use or from historical data acquired from the consumption portal.

This cloud native solution has been based on Azure Kubernetes, Azure Postgres, Azure B2C, Azure Data Factory, Azure API Management and many other managed services from its inception. This foundation gives the solution scalability, performance and operational stability, as well as adaptability to changing market conditions and customer needs, customization of services and processes based on specific customer needs, and improved competitiveness.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
