

Envisioning and pilot deployment: 4 week accelerator

Fast-track your journey to a reimagined workplace for up to 500 users

Cognizant's envisioning and pilot is designed to provide you with an immersive experience with Copilot for Microsoft 365. We will work with you to identify key personas, processes and business scenarios that can be reimagined with Generative AI. Following envisioning, we assess your licensing and technical readiness and enable Copilot with end user communication and training for up to 500 users.

Test drive Copilot for Microsoft 365 to see how it can improve your workplace experience

- Facilitated workshops with key business stakeholders
- Identification of up to 2 key personas and processes that can be reimagined with Copilot
