

VIRTUAL CISO SERVICES

WITH eGROUP ENABLING TECHNOLOGIES STRATEGIC ADVISORY SERVICES

CIOs are busy leading the digital initiatives of the business, often leaving security behind other priorities. With Chief Information Security Officers' salaries averaging \$233,000 (Salary.com), hiring and then retaining a full-time resource is often untenable- yet security programs, policies, procedures, cyber insurance, and user awareness are critical to survival.

eGroup Enabling Technologies has a staff of industry IT Executives who are former digital risk managers of their organizations. Trust a partner with "been there, done that" experience to serve as your vCISO.
