

Secure Multi-Cloud Environments Workshop

Get a customized threat & vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system.

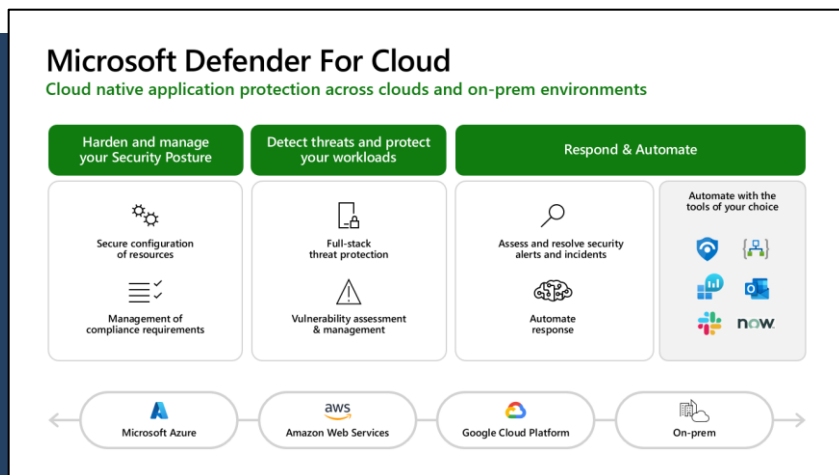

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your hybrid and multi-cloud security objectives—and identify current and real threats—by scheduling a Secure Multi-Cloud Environments Workshop.

Improve your cloud security posture.

We can help you develop a strategic plan customized for your organization and based on the recommendations our security experts. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to improve your security posture for the long term.

With this five-week workshop, our experts will work with you to:

- Identify current, security threats and vulnerabilities in your hybrid and multi-cloud environment.
- Obtain actionable next steps based on your specific needs and objectives.
- Document your security priorities and needs for the benefit of key stakeholders.
- Better understand how to accelerate your security journey using the latest tools.

Workshop Highlights

- Discover threats and vulnerabilities in your hybrid environment
- Learn how to prioritize and mitigate potential threats to your servers and services
- Understand what can be done to reduce the attack surface area for hybrid workloads
- Learn about the benefits and capabilities of Microsoft Defender for Cloud and Azure Network Security
- Develop defined next steps based on your needs and objectives

What To Expect

During this workshop, we'll partner with you to strengthen your organization's approach to hybrid cloud security. We'll help you better understand how to prioritize and mitigate potential attacks:

CompuNet's experts in Microsoft compliance will provide you with a:

- **Analyze** your requirements and priorities for a hybrid cloud security detection and response solution.
- **Define Scope** & deploy Microsoft Defender for Cloud in the production environment, onboarding servers and other selected services.
- **Explore** Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- **Discover** existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- **Discover** threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- **Recommend** next steps on proceeding with a production deployment of Microsoft Defender for Cloud and Azure Network Security.

We'll customize the workshop based on your organization's needs
