

Application Development

DESCRIPTION

ELEKS will help to transform Clients vision and requirements into a tailored software solution, on time and budget.

Based on specific needs and projected scope, we will cover all aspects of a successful delivery: requirements elicitation, development, testing, documentation to project governance & risk management.

SERVICE DELIVERABLES

Working application (deployed):
Code/Accompanying documentation/Agreed level of quality/Acceptance criteria completed

WHY THIS SERVICE

Ability of ELEKS to provide development that is compliant with specific regulation /security standards.

ELEKS utilizes its experience transformed into the set of approaches & best practices that **minimize bottlenecks** though delivery.

Product co-creation which manifests itself via a number of techniques & workshops ELEKS is using to develop empathy for the Clients problem, validate initial hypothesis & together craft solid foundation for development.

ELEKS can accelerate Clients product development by using our **Delivery Framework** that was created as a result of polishing the best plastics throughout 28+ years of experience.
