Application Development

Service overview

ELEKS provides full cycle development and integration

You can start with a single application and proceed with us to develop a complete software ecosystem.

Based on your specific needs, we will cover all aspects of a successful delivery - from idea validation, development, testing and documentation to project governance.

ELEKS will take full responsibility to deliver end-to-end software on time, on budget and within scope.

ELEKS will help you to:

Launch new products on the market on time and within budget

Stay ahead of competitors by adopting creative and innovative solutions

Partner with an expert team fully responsible for project implementation

Improve your business operations by process automation

Focus on business activities while experts develop your software

Support

CROSS-FUNCTIONAL CORE TEAM

Our Advantages

On-site presence

We provide on-site presence of the ELEKS team to elicit the requirements through joint sessions with stakeholders from the Client's side.

Product design workshops

We hold product design workshops with the client to co-create product concepts, validate hypotheses, identify user personas, develop journey maps and create prototypes before the development starts.

ELEKS continuously explores and validates the business value of the new est technologies.

Centers of Excellence

ELEKS Centers of Excellence ensure professional growth through competence and expertise development.
