Increff WMS

SaaS-based Warehouse Management (WMS) and Order Fulfillment Solution for e-commerce business.

The Need

Evolving customer demands and multi-channel shopping preferences have intensified the need for inventory accuracy. Legacy WMS solutions are not equipped to handle levels of complexities e-commerce and D2C industry demands. Fragmented inventory exposure on multiple sales channels leads to mismanagement, loss in sales opportunities, stuck working capital, and higher operational costs.

The Solution

Increff WMS, a new-age, web-based cloud-hosted WMS solution facilitates a single view of inventory, simultaneously, across all sales channels. Its real-time inventory-order sync feature, allows even the last pieceto be exposed as stock levels adjust as soon as a sale ismade. Serialization guarantees inventory-order accuracy, higher picking efficiency, perfect utilization of warehouse space, and faster order processing for effortless end-to-end warehousing, and higher customer satisfaction.

What is there for you

100% inventory exposure to all sales channels, simultaneously

2x-3x increase in sales velocity

20-25% Lower manpower cost

20% reduction in inventory holding

99.9% order fulfillment accuracy within SLA

100% Digitization to reduce training time and boost productivity from day 1
