

Let us set you up for success with a smart workplace

Level up your work, team up for greater impact, and scale up your business to achieve more with Diversified and Teams

The increasing volume of meetings, calls, and collaboration that employees face today make it challenging to keep up with the pace of work. As a result, many organizations find themselves stretched too thin, leading to hidden costs, increased risk, employee burnout, and an inability to focus on what matters.

As a trusted Microsoft Partner, we recommend a smart workplace with Teams. This solution modernizes your communications and collaboration platform by bringing together Teams Phone, Teams Premium, and Teams Rooms. You'll reduce costs, enhance secure knowledge sharing, and streamline routine tasks using AI capabilities. And with our expertise, we make the process fast, easy, and hassle-free.

Get your business ready to support the future of work with a smart workplace with Teams

Teams Phone

Stay connected from any location, with voice and video calls through VoIP and PSTN.

Teams Premium

Make your meetings more intelligent, personalized, and protected.

Teams Rooms

Turn any room into an inclusive meeting space where you can fully participate from anywhere.

When your communication solutions converge, your team can unlock intelligent productivity and cultivate flexible workspaces to work securely anywhere.

Intelligent productivity

Focus on work that matters. Smart workplace with Teams delivers intelligent capabilities, tools, and AI-rich engagements, inside and outside the organization, improving productivity and keeping you and your team focused on high-value work.

Workplace efficiency

Leverage AI-enhanced, high-quality audio and video in meeting spaces. Integrations with contact center solutions transform business processes, increase productivity and save employee time. A seamless customer experience enables clients to receive text reminders and join custom-branded virtual appointments through their mobile devices.

Flexible workspaces

Give your employees the flexibility to shift seamlessly between devices and spaces without interruption to the flow of work. A consistent and intuitive Teams interface makes collaboration and communication hassle-free. Immersive experiences with AI-powered software and intelligent hardware capabilities foster inclusive and interactive connections for everyone, regardless of where they are or how they connect.

Advanced protection

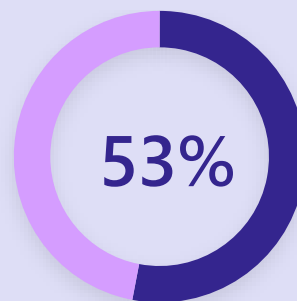

Safeguard sensitive meeting information, automate meeting controls, and deter leaks so you can securely collaborate. AI-powered security insights and management tools enable uninterrupted remediation powered by AI insights and management. Advanced call controls minimize distractions and protect your employees from potential spam, fraud, and more.
