

# App Source Offering: Low Code and Copilot Enablement for Citizen Developers and Business Users

“A two-day workshop to introduce Power Platform and its benefits for building and managing business solutions”

## Overview

Power Platform is a suite of tools that enables anyone to create low-code applications, automate workflows, analyze data, and build chatbots. With Power Platform, you can empower your Citizen Developers and business users to solve business problems without relying on IT or coding skills. You can also leverage the Copilot feature to get guidance and best practices from Microsoft experts while building your solutions.

Our two-day workshop covers the following topics:

### Day 1

- Power Platform capability awareness and hands-on demo.
- Components of Power Platform: Power Apps, Power Automate, Power BI, and Power Virtual Agents.
- Hands-on session on some of the features and capabilities of Power Platform.

### Day 2

- Power Platform Center of Excellence awareness and demo.
- Best practices to help you govern, manage, and monitor your Power Platform environment.
- A demo of how the COE can help ensure quality, security, and compliance of your Power Platform solutions.

## Value Proposition

By attending this workshop, you will gain the following benefits:

Understand the value and potential of the Power Platform for your business needs and scenarios.

Hands-on experience with the Power Platform; see how easy and fast it is to create and deploy low-code solutions.

Learn how to use the Copilot feature to get expert guidance and recommendations while building your Power Platform solutions.

Discover how to use the Power Platform COE to manage and govern your Power Platform environment and ensure quality, security, and compliance of your solutions.

Receive access to additional resources and support to help you get started and succeed with Power Platform.

## Target Audience

Citizen Developers and Business users who want to learn how to use the Power Platform to create and manage business solutions. No prior coding or technical skills are required. However, basic familiarity with Microsoft 365 and cloud computing is recommended.

## Prerequisites

- You will need the following to participate:
- A laptop or tablet with internet access and a web browser.
  - A Microsoft 365 account with access to Power Platform.
  - Willingness to learn and explore new possibilities.

## Agenda

The workshop will run for two days, from 9:00 AM to 5:00 PM.

### Day1

Time	Topic
9:00 AM – 10:30 AM	Introduction to the Power Platform and its components
10:30 AM – 10:45 AM	Coffee break
10:45 AM – 12:15 PM	Hands-on demo of Power Apps and Power Automate
12:15 PM – 1:15 PM	Lunch break
1:15 PM – 2:45 PM	Hands-on demo of Power BI and Power Virtual Agents
2:45 PM – 3:00 PM	Coffee break
3:00 PM – 4:30 PM	Introduction to the Copilot feature and how to use it
4:30 PM – 5:00 PM	Q&A and feedback session

### Day2

Time	Topic
9:00 AM – 10:30 AM	Introduction to the Power Platform COE and its components
10:30 AM – 10:45 AM	Coffee break
