Customer Success

Company: Volkswagen

Challenge:

- Identifying key stakeholders across business, technical, and digital product leaders.
- Capturing business objectives, technical landscape, and key considerations for cloud roadmap.
- Identifying ways to accelerate cloud adoption by getting expert guidance on:
 - Current business and technical challenges.
 - Existing workload types, current cloud use, volumes, and related issues.
 - Exploring possibilities of Cloud Transformation to address current and future business ambitions.

Solution:

- EVIDEN provided strategic advice and technical expertise to migrate Volkswagen to the cloud and helped integrate cloud-native thinking into its entire application design process.

Outcome:

Now that Volkswagen is leveraging the cloud as a development platform and can access a rich ecosystem of services, the company has:

- **Accelerated deployment capabilities**
- **Improved security and code reliability**
- **Distributed, resilient applications by design**
