

Azure DevOps and Portfolio Management: 3-Day Workshop

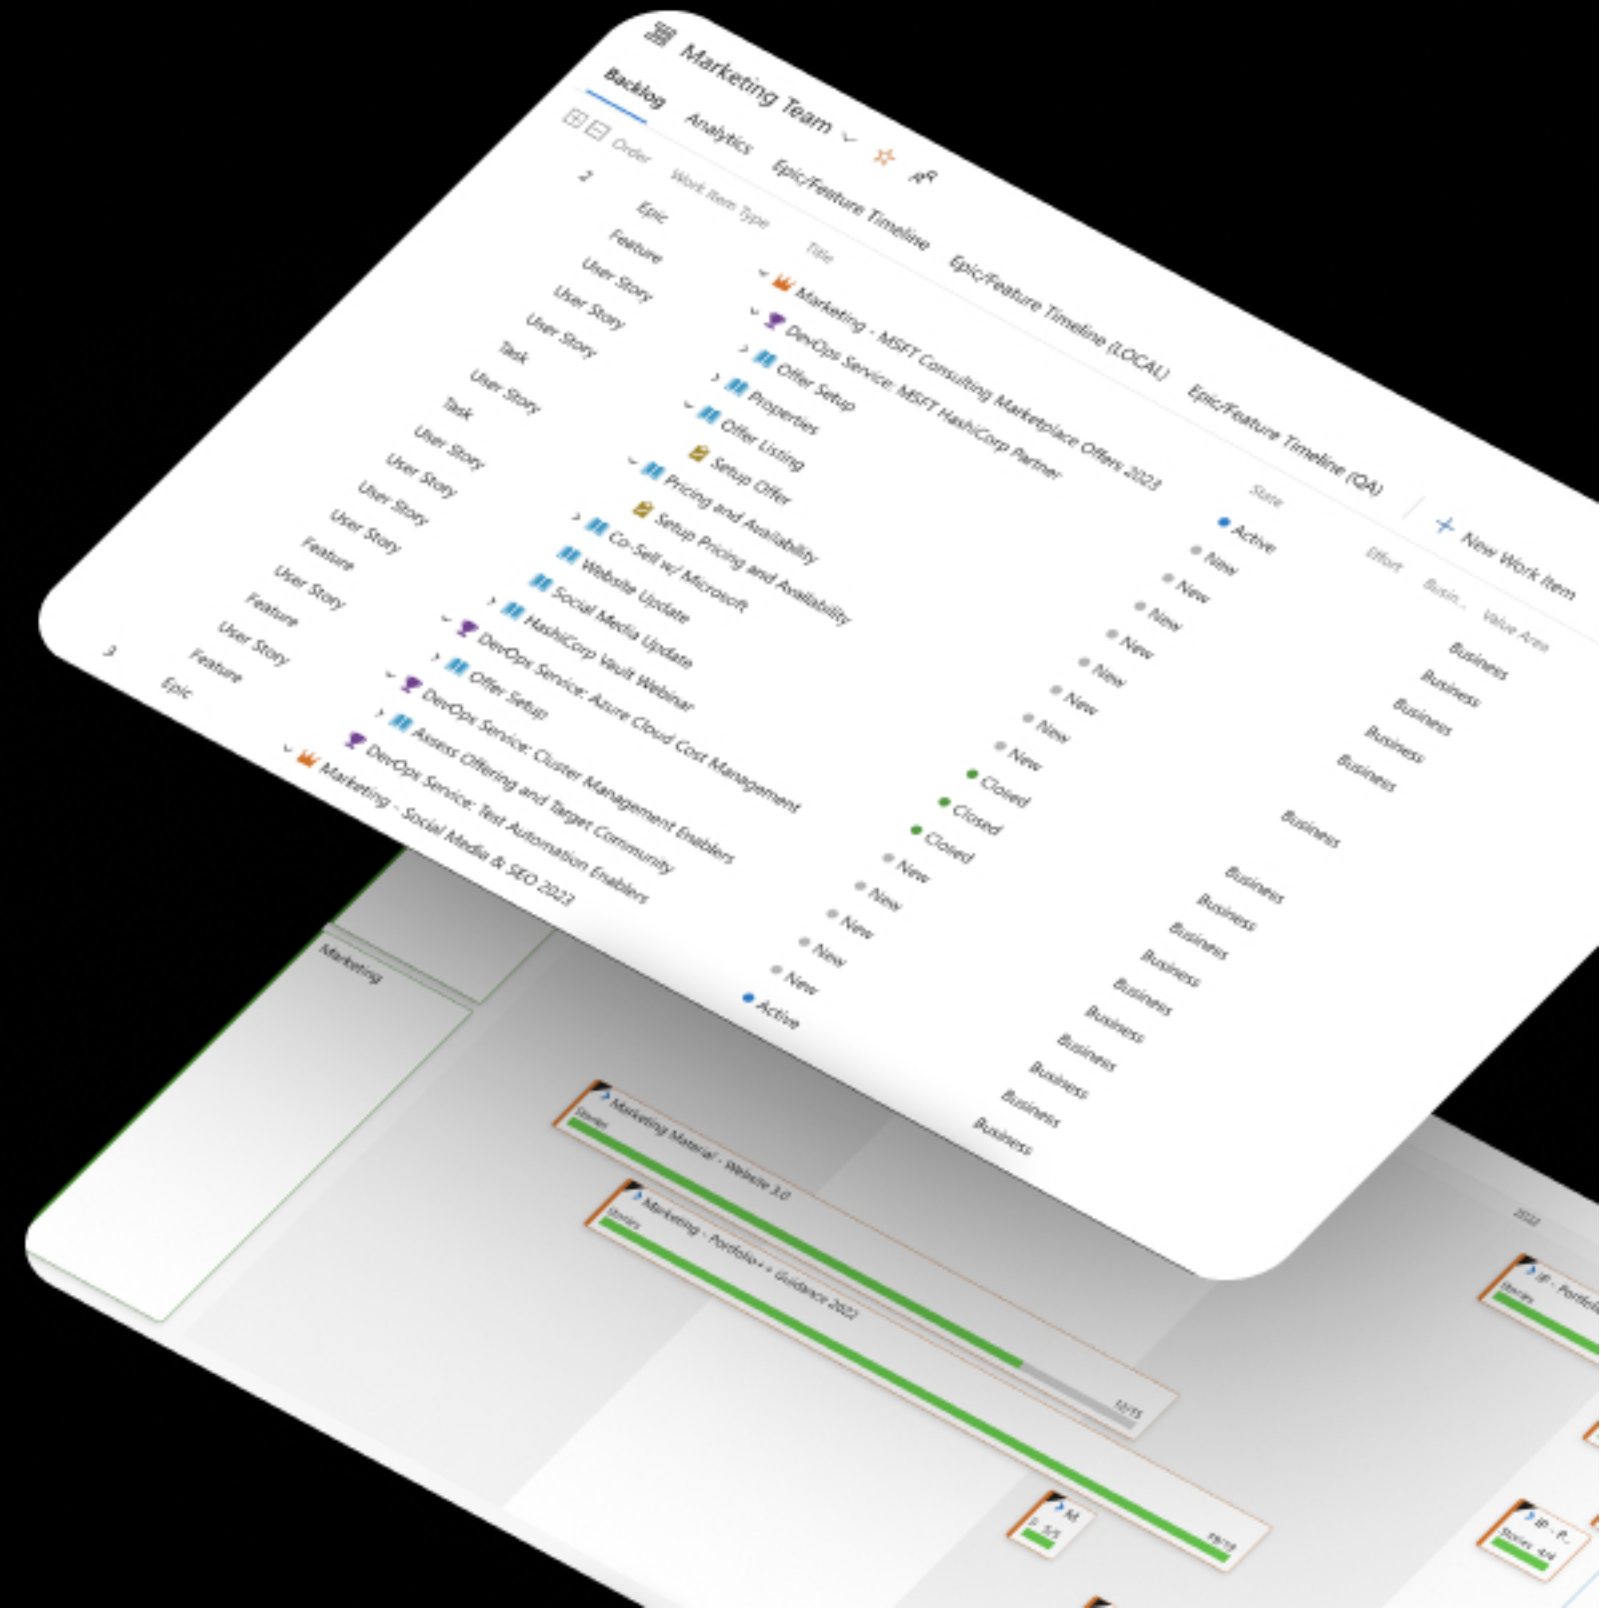

Day 1

Assess

We will discuss the scope and scale of your organization, and how to structure it in Azure DevOps using:

- Projects & Areas
- Teams & Permissions
- Process Templates
- Epics & Features

Day 2

Plan

We will guide you through estimating and planning work with a focus on:

- Story Points & Effort
- Iteration Path
- Velocity & Capacity

Day 3

Portfolio++™

Portfolio Management evolves from agreements, communication, and collaboration points. Using the Portfolio++ extension, we will discuss Portfolio Management in terms of:

- Teamwork & Planning
- Program Increment & Release Management
- Quality Assurance
- Definition of Done
