Unlock next-level productivity

with Orange and AI-powered Microsoft 365 Copilot

What is Microsoft 365 Copilot:

Microsoft 365 Copilot is an AI-powered productivity tool designed to enhance your work experience within Microsoft 365 apps. It can:

- Seamlessly integrate Generative AI features such as content generation, rephrasing, analyzing, translation or summarizing content in the Microsoft 365 applications (including Teams, Word, Excel, PowerPoint, Outlook, Loop and more).

- Act as your AI Assistant at work, helping you tackle tasks more efficiently and effectively by responding to your questions, writing your emails, translating your documents, and creating code or formulas for you.

- Be a game-changer that can revolutionize the way you work, save you time, and enhance your productivity and creativity.
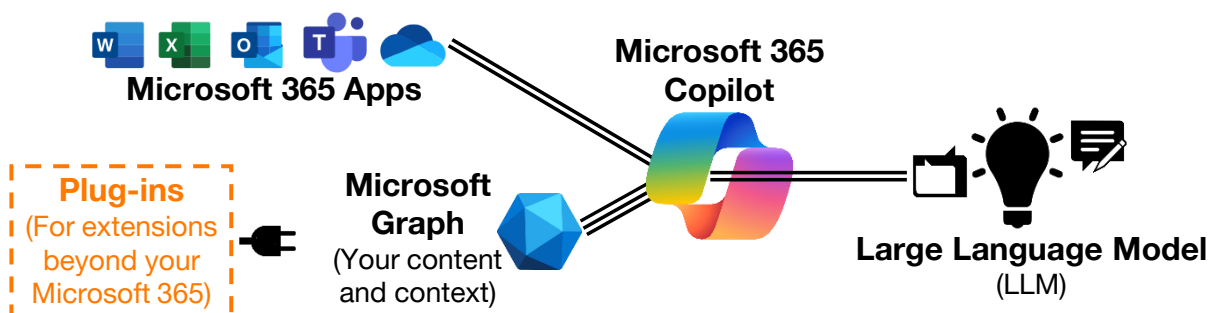

And what it is not:

Not the pilot:

- Microsoft 365 Copilot is not the pilot; you are! Think of it as your trusty co-pilot. It won't access information beyond what you have access to, nor will it take over all your tasks.

- It's there to assist you, enhance your productivity, and make your work smoother.

Not a standalone app:

- Copilot is not a separate application. Instead, it seamlessly integrates into Microsoft 365 applications.

- Leveraging the capabilities of Generative AI, it becomes an integral part of your favorite Microsoft 365 tools.

Path to AI excellence: Navigating Copilot adoption

Orange Business is a pioneer in the AI field, with a lot of experience and knowledge in data collection, transportation, storage, processing, analysis, and sharing. We help businesses create extra value through AI, providing a broad range of services and solutions. With more than:

300 active AI projects

20+ generative AI experimentations

500 patents registered around AI and Big Data

3,900 experts in AI

Orange has a profound comprehension of neural networks and AI. We smoothly integrate data analytics and artificial intelligence, giving unmatched insights for our clients. Orange Business is a strategic cybersecurity advisor and a Microsoft partner with extensive experience in data, cloud, and AI.

In 2023 Orange joined Microsoft's Copilot Early Adopters Program (EAP), with 300 employees who used Copilot daily for many months and tested every feature and functionality. They developed over 50 different Copilot use cases for all kinds of job roles, from developers to marketers, from designers to managers.

Choose Your Copilot Adventure

Orange has built four AI consulting offers to help you get started with Microsoft 365 Copilot:

Jumpstart:

a four-week engagement that will introduce you to the concept and capabilities of Microsoft 365 Copilot, and help you assess your prerequisites, impacts, and governance. You will also receive a high-level change management plan and recommendations for the next steps. This option is ideal for those who want to get a quick overview of what Microsoft 365 Copilot can do and how it can benefit their organization.

Assessment:

for details

a twelve-week engagement that will help you prepare for the adoption of Microsoft 365 Copilot and evaluate its potential value for your organization. You will receive a comprehensive assessment of your current state, your readiness for Copilot, your use cases, your security and compliance risks, and your expected outcomes. You will also receive a detailed implementation roadmap that will guide you through the next steps of your transformation journey. This option is ideal for those who want to have a thorough understanding of what Microsoft 365 Copilot can do for them and how to get ready for it.

Experiment:

a three-month engagement that will allow you to test Microsoft 365 Copilot live with 300 selected users, and evaluate its performance, satisfaction, and value. You will also receive support in defining usage policies, user adoption materials, communication plans, training, and user support. This option is ideal for those who want to validate their use cases and expectations and measure the return on investment of Microsoft 365 Copilot.

Adaptation:

This is a three-month engagement that will enable you to customize Microsoft 365 Copilot for your specific needs and use cases, if the out-of-the-box solution is not enough. You will also receive support in ideation, feasibility study, gap analysis, user journey, data source integration, testing, and hyper care. This option is ideal for those who have a clear vision of what they want to achieve with Microsoft 365 Copilot and need technical assistance to make it happen.

If you are interested in any of these options, please contact us to schedule a free consultation and/or a demo of Microsoft 365 Copilot.
