skypointcloud

AI Platform for Value-Based Care

Our AI solution empowers your people to safely engage accurate data through generative AI, access self-serve analytics, automate tasks, and chat with personal AI copilots to fully optimize productivity across the organization.
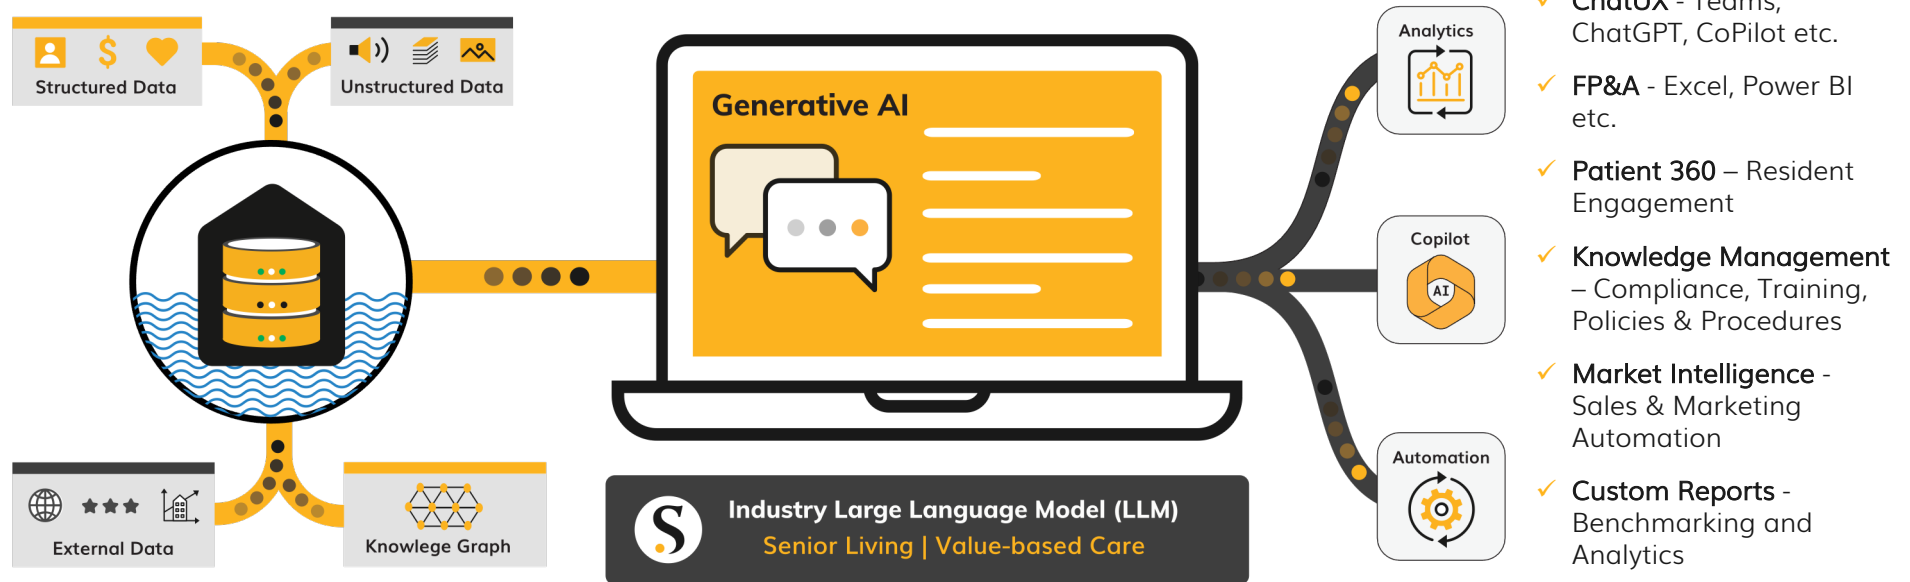

1. Unify Your Data Sources

Unify structured data (CRM, Financial, Clinical, etc.) unstructured data (documents, video, and audio) and external data (reviews), centered by your enterprise knowledge graph for contextual grounding.

2. Chat With Your Data (ChatGPT)

By combining your enterprise knowledge graph, data sensitivity labels, and a **trained data set (industry LLM),** users can quickly engage with your organization's data set, or external industry data set, using conversational language.

3. Optimize Productivity

Engage **personal AI copilots** to streamline and act on key business elements:

Structured Data

Unstructured Data

Generative AI

Analytics

Copilot

Automation

External Data

Knowlege Graph

Industry Large Language Model (LLM)
Senior Living | Value-based Care

- ✓ **ChatUX** - Teams, ChatGPT, CoPilot etc.
