AI WORKSHOP

Exploring Efficiency and innovation:
A deep dive into AI!

Unlock sustainable business optimization with Artificial Intelligence!

In an era where artificial intelligence transcends mere buzzwords to become an indispensable reality for forward-thinking companies, you face a pivotal question: How can you identify and harness the right AI strategy for your organization to drive genuine innovation? How can AI be leveraged to optimize and enhance the performance of your business model?

Our exclusive one-day workshop is your gateway to the world of effective business optimization through artificial intelligence. Dive in and explore the technology and gain insights into how you can utilize it to create tangible value, streamline processes, and foster enduring innovation.

We will illustrate why the question is no longer whether to implement AI in your organization, but how to do it effectively, enabling you to optimize existing processes and chart new territories. From capital efficiency gains to precise order and forecast optimization, and seamless process automation through process mining - we spotlight the concrete pathways through which Microsoft Dynamics, powered by the Power Platform, AI Builder, and Copilot, is paving the way to sustainable success and transformative innovation.

Workshop agenda:

Navigation of the AI universe:
- Introduction to artificial intelligence.
- Practical examples and success stories.

Exploring Microsoft´s AI toolbox:
- A brief overview of Power Platform, AI Builder, and Copilot.
- Seamless integration with Microsoft Dynamics.

AI in action for your success:
- Emphasizing business process optimization.
- Interactive session: Defining individual use cases.

Ensuring sustainable AI implementation success:
- Essential components for a successful AI deployment.
- Best practices for seamless integration into company processes.
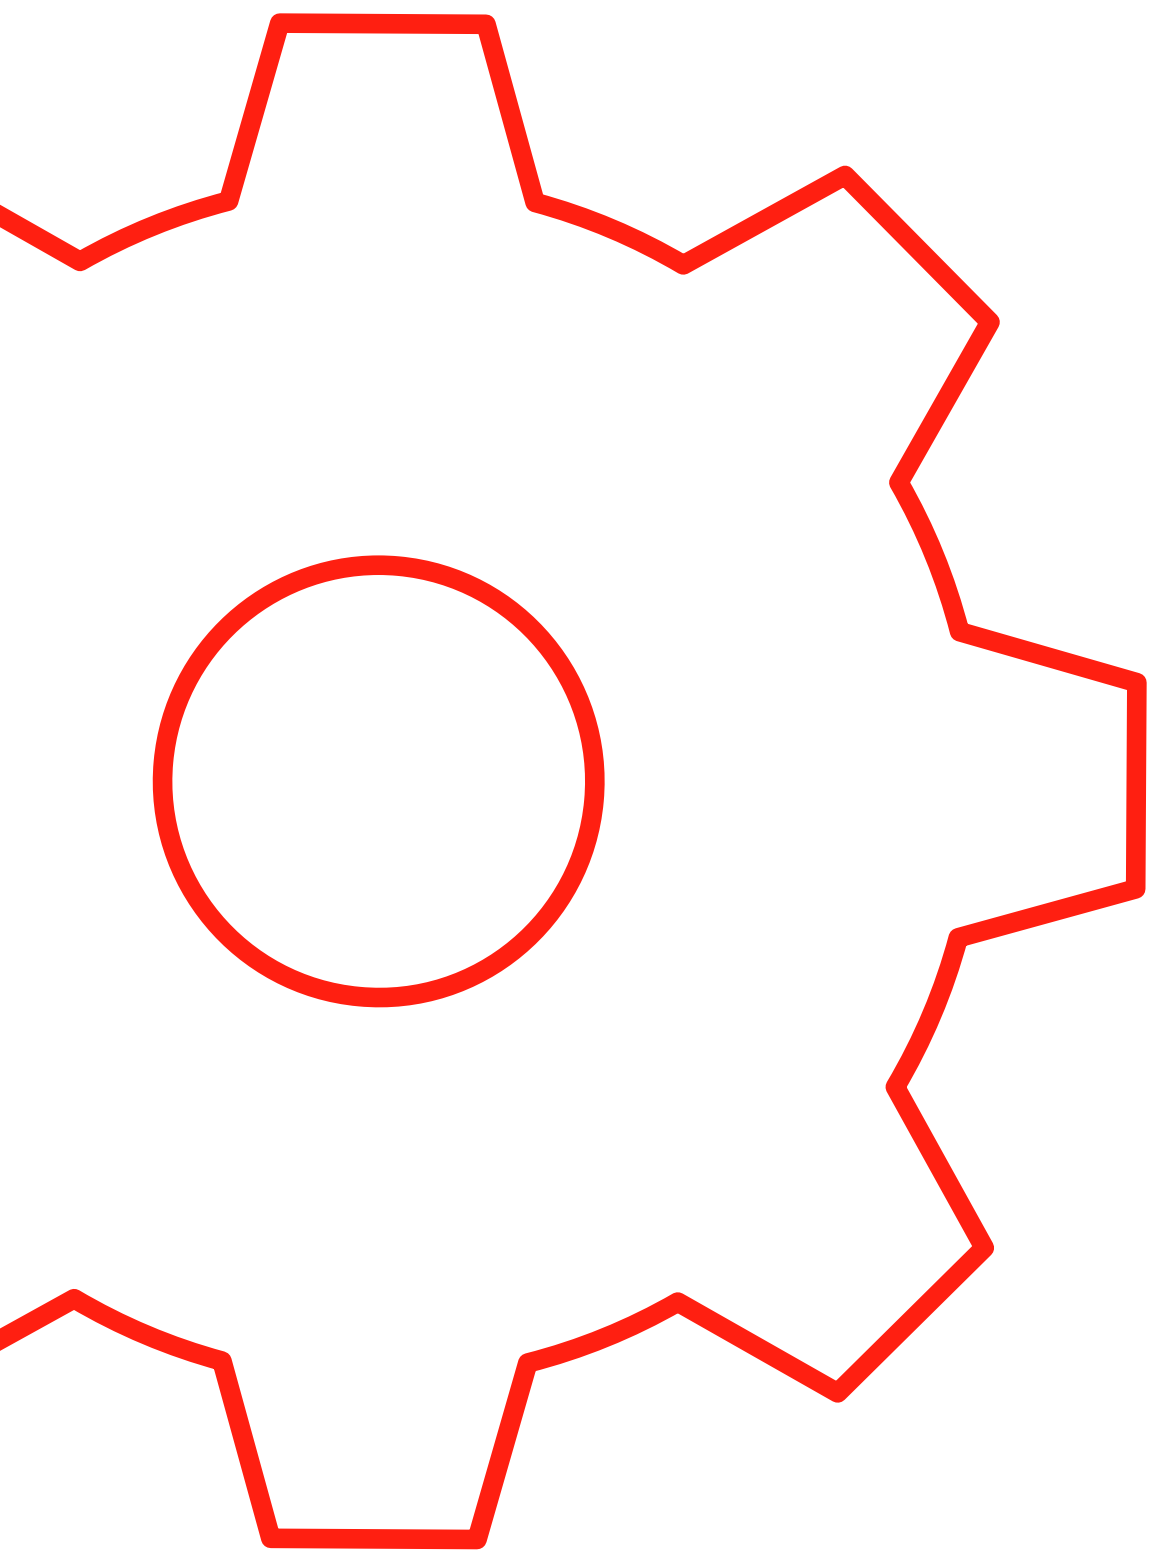

Experience live AI solutions:
- AI solutions in action.

The five pillars of AI success:
- Crucial factors for effective utilization.
- Best practices for integrating AI into business processes.

Interactive session: Defining use cases:
- Collaborative development of potential use cases.
- AI as a catalyst for organizational transformation.

Tangible **benefits**
for your company:

1. Identification of tailored use cases.

2. Crafting an AI integration strategy.

3. Gaining insights into Microsoft´s AI tools.

Why choose this **workshop**?

Experience tailored solutions for Your business. Unlike conventional workshops, we provide personalized consulting to ensure the concepts presented seamlessly integrate into your business processes.

Who should attend this **workshop**?

This workshop is designed for managers, IT decision-makers, process owners, and data analysts who seek to harness the full potential of artificial intelligence. If you aspire to elevate your company's efficiency and innovation to the next level, this workshop is tailored for you.

This isn't just another AI event; it's your roadmap to successful implementation and innovation. Discover how to conquer the challenges of the modern business landscape with the right AI tools and forge genuine competitive advantages.

Are you ready to actively shape your company's future? Secure your spot now and uncover the secrets of developing the ideal AI strategy for sustainable business optimization and innovation.
