

# Company Presentation

**inSyca IT Solutions GmbH**

January 2024

# We not only connect systems, but also people.

The digital age presents companies with major challenges: Supply chains and processes must function efficiently and in real time in order to meet customer expectations.

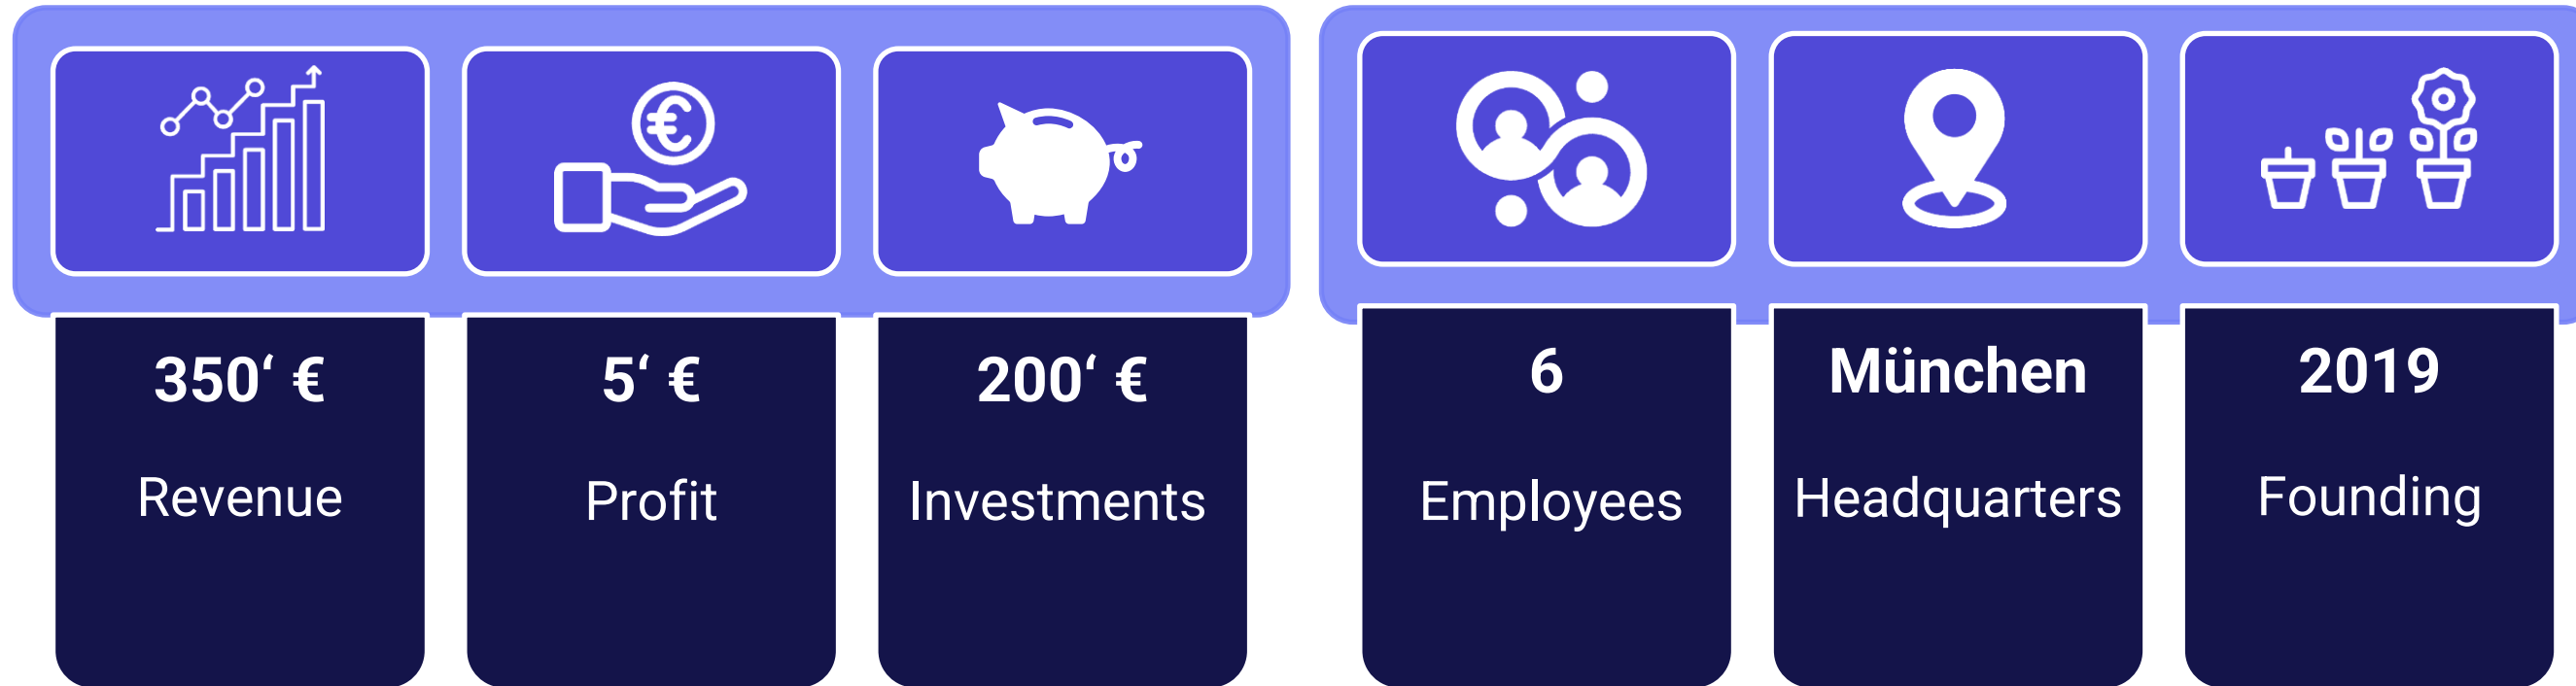

At inSyca, we have therefore made it our mission to support companies in seamlessly integrating applications, data and processes. In terms of technology, we use the entire spectrum of Microsoft Azure Integration Services.

By developing integrated solutions that link local and cloud-based applications and services, business workflows can be made consistent and scalable. In addition, the provision of APIs opens up completely new possibilities for business models.

This enables companies to work successfully with their business partners, to strengthen their competitiveness and to ideally positioning themselves for a digital future. This is what we work on for and with our customers.

# Strategy And Goals

**Our five strategic priorities focus on continuous further development and optimization in order to guarantee the best possible quality of service and product range.**

- **Digitization of data:** Capturing and converting analog data into digital formats.
- **Automation of processes:** Use of software and systems to automate recurring tasks and processes.
- **Digital communication:** Use of digital channels such as email, chat, social media, etc. for internal and external communication.
- **Data analysis and interpretation:** Use of data analysis tools and techniques to identify patterns, trends and insights from the data collected.

- **Introduction of cloud technologies:** Migration of data, applications and services to the cloud to improve scalability, flexibility and cost efficiency.
- **Implementation of AI and machine learning:** Integration of artificial intelligence and machine learning to make data-driven decisions, optimize processes and make predictions.
- **Digital transformation of business models:** Redesigning business processes and models to fully leverage digitalization and unlock new value creation opportunities.

# SaaS Solutions For EDI

**Azure Cloud consulting and strategy development:** Analysis of the client's requirements, development of a customized Azure Cloud strategy and advice on best practices for SaaS development.

**Architecture design and solution consulting:** Design and development of cloud architectures that are scalable, reliable, secure and cost-efficient. Advice on Azure services and technologies best suited for SaaS development.

# Core Values

**Authenticity:** We are who we are and know what we are capable of and where our limits lie. Everyone has their own unique nature, and we find that enriching.

**Humanity:** Fairness, open communication at eye level and respectful cooperation are important to us, as are trust and honesty.

**Integrity:** We attach great importance to transparency in our collaboration with customers, business partners and within the team. Compliance with legal requirements such as GDPR, occupational health and safety, etc., is a matter of course for us. We live our Code of Conduct.

**Progressivity:** We see change and transformation as an opportunity to continuously develop our knowledge and expertise. Curiosity about future trends and tendencies keeps us in tune with the times - and our customers benefit from this too: They are always one step ahead!

**Sustainability:** It is important to us to reinforce and promote an awareness of the need to protect our natural resources. For us, sustainability also means long-term cooperation with other companies in a spirit of partnership and targeted support for our employees.

# People At inSyca

"Our passion is to open the door to digitalization wide for companies of all sizes. We firmly believe that every company, regardless of its size, should take advantage of the transformative potential of digitalization. Our goal is to create individual, tailor-made solutions that are not only cost-efficient and time-optimized, but also capture the hearts and minds of our customers. Because in an increasingly digitalized world, the ability to harness innovation should not be a question of size, but a question of vision and commitment."

*Iwe Kardum, Managing Director & Nina Zimmert, Office Manager*

# References

We are delighted to work with companies from a wide range of industries and to inspire them with our solutions. Please take note, that we are obliged not to name most of our (industrial) customers due to confidentiality agreements. Therefore, we are only providing an excerpt from our customer portfolio.
