

Windows 365 Enterprise: 4-Week Production Pilot Implementation

**Holistic Approach.
Business Efficiency.
Modern Security.**

Pilot highlights

-  Improve your knowledge of cloud-based end-user computing options using Microsoft solutions
-  Learn how Windows 365 unlocks enterprise hybrid work scenarios to deliver a secure and productive desktop experience from anywhere
-  Pilot Windows 365 Cloud PC provisioning and management in your production environment for selected users
-  Build a plan for full rollout by adopting Windows 365 solution covered in this pilot

Gain firsthand experience of Windows 365's capabilities and tailor it to meet the unique requirements of your organization.

Get an executive deep dive into Windows 365 that provides your employees access to a secure and productive desktop experience from virtually anywhere. Our goal is to show you how Windows 365 unlocks your enterprise hybrid work scenarios and to work together on piloting Windows 365 Cloud PC provisioning and management in your environment for selected users.

We'll work with you to:

- Learn how to provision and manage Windows 365 Cloud PCs, running Windows 11, with Microsoft Intune.
- Discover how to empower IT with easier Windows and device management.
- Secure your users' identities and devices with zero-trust security for your Windows 365 Cloud PCs.
- Enable your users to be productive from anywhere by accelerating onboarding and offboarding of employees, vendors, and contractors across a variety of devices.

Value proposition

Experience the power of Windows 365 / Cloud PC provisioning and management within your own production environment.

This pilot focuses on understanding the dependencies on requirements for Windows 365 pilot, as well as dependencies around Entra ID scenarios and use cases for accessing on-premises assets where applicable. The ultimate objective is to provide fully provisioned Windows 365 environment with customized Success Criteria Metrics important for your organization.

Why Ravanty?

Ravanty brings the power of doing an actual Production Pilot scenario for Windows 365, which holds significant value for organizations seeking to leverage this innovative cloud-based solution and experience the power in their production environment. This also ensures that project time is spent productively to establish the foundation for short- and long-term plans.
