

Bulletproof Copilot for Microsoft 365 Readiness Assessment

What is it?

The Bulletproof team will help your organisation prepare to deploy Copilot for Microsoft 365 in a manner that is manageable and a fit for your business. To ensure the deployment protects your data while Copilot for Microsoft 365 enables business productivity and creativity, Bulletproof will assess your readiness, help in your information governance development, and provide recommendations for your rollout.

Our process

The Bulletproof process will guide you by bringing our best practice approach to your preparation and deployment; Including stakeholder engagement, a baseline review of existing information management related policies and standards, and a technical examination of current setup, and a licensing review. This is all supported by active knowledge transfer to users and technical staff.

Benefits

- Understanding your current data and the governance surrounding that data is important to understanding what Copilot for Microsoft 365 will use as its data source.
- Utilize a team of Information Management and Data Security experts.
- Best practices based on our own and client experience.
- Leverage a standard framework and process.
- Understand your readiness.
- Engage business units to understand impact.
