Secure Modern Workplace with *Microsoft and Ergo*

The Microsoft 365 secure audit for your Modern Workplace environment.

Secure your Modern Workplace with *Microsoft and Ergo*

This Microsoft 365 Security engagement will cover the Microsoft 365 platform, user identity, organisational data and the set of in-use Microsoft 365 services.

Recommended security configuration updates and service changes will be highlighted and where additional licensing is required to achieve the recommendation, this will be highlighted too.

The end goal of this engagement is to produce a detailed technical report that steps through the findings, recommendations and timelines in a clear and straightforward way.

We provide a review and audit of the Microsoft 365's current security configuration, a set of detailed and prioritised recommendations and an executive summary that includes a suggested order and timeline for the deployment of these recommended items

The Microsoft 365 audit is broken down into four sections:

1. Identity and Access Management
2. Threat Protection
3. Information Protection
4. Security Management

Each of these sections covers a key aspect of Microsoft 365 security.

Identity & Access Management

Protect users' identities & control access to valuable resources based on user risk level

Threat Protection

Protect against advanced threats and recover quickly when attacked

Information Protection

Ensure documents and emails are seen only by authorized people

Security Management

Gain visibility and control over security tools

Why *Ergo*

We're proud to be Microsoft Ireland Modern Work Partner of the Year 2023. For the fifth time in six years, Ergo has been recognized by Microsoft for its market-leading modern workplace solutions.

As a Solutions Partner for Modern work, Ergo has market-leading capabilities to help customers boost their productivity and make the shift to hybrid work using Microsoft 365.

As a Solutions Partner for Security, Ergo has market-leading capabilities to help customers safeguard their entire organization with integrated security, compliance, and identity solutions.
