

Connect documents that reside in electronic systems to the entire business and your customers

SysConnect captures critical content from high-volume transactions that occur in line-of-business systems. Centrally managed software and business rules automatically restructure and distribute data in the format needed for downstream use cases. Think of SysConnect as an internal integration engine to rapidly repurpose document content for your business.

Important business data is often trapped in proprietary and specialized systems. The efficiencies and benefits of these technologies can create inefficiencies and even block the ability to exchange digital information between trading partners, with customers, and even between functional areas of the company. Inefficient document capture and distribution costs companies millions of dollars each year in unseen waste relating to data re-entry, operational errors, document storage and retrieval, and process delays.

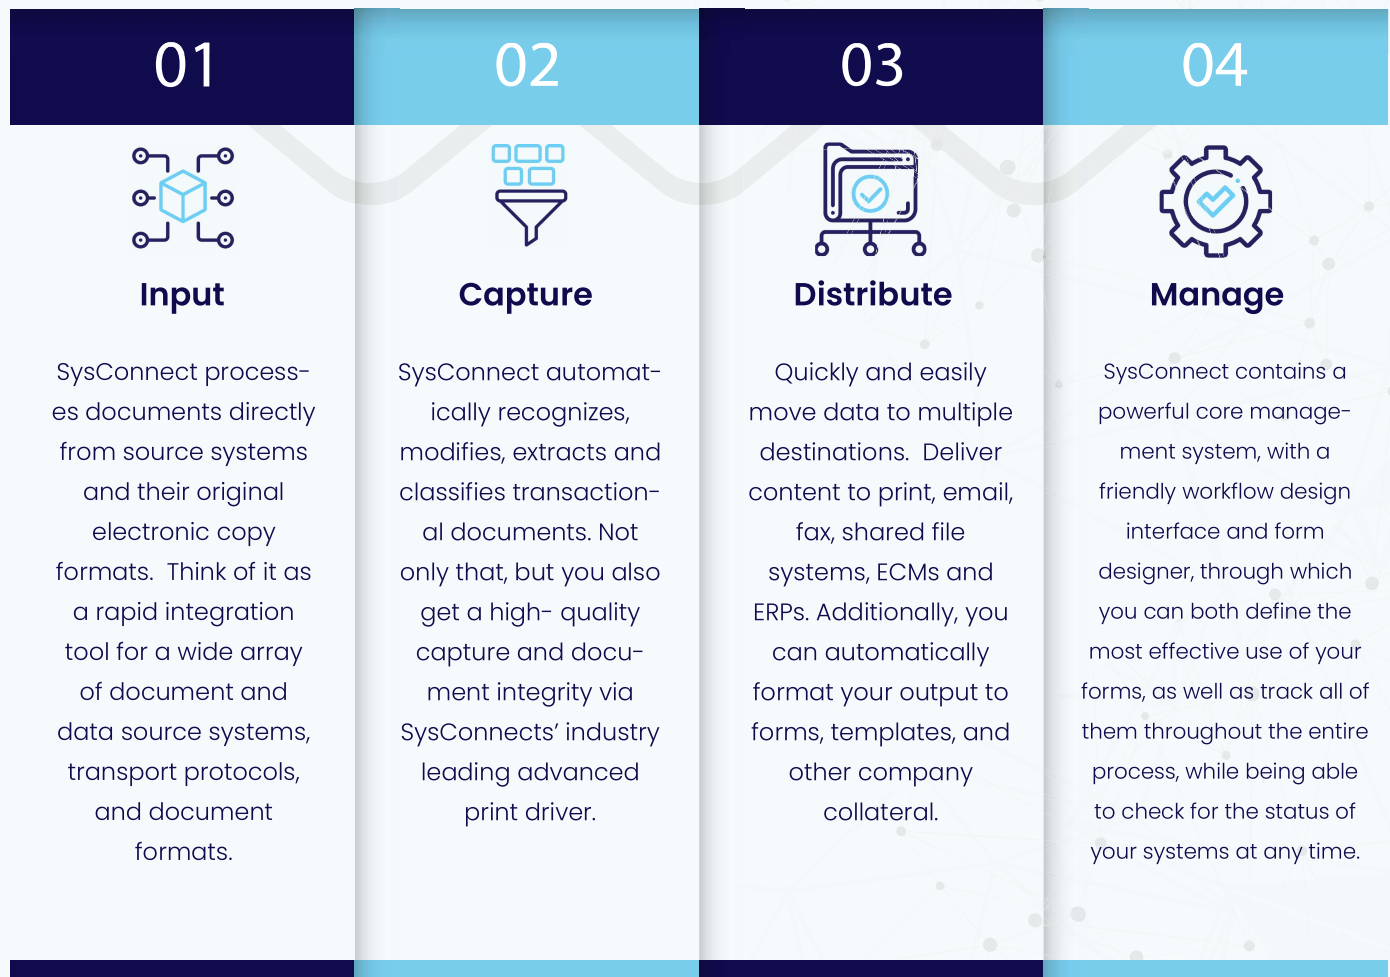

So how does SysConnect extend the value of documents that are trapped in machine-readable, electronic formats?

We create **Connection**. Using powerful print driver technology, SysConnect establishes an **input** agent from electronic documents and systems. Our industry-leading **capture** technology maximizes document recognition, in-line modification, content extraction, and document classification. This allows SysConnect to **distribute** the document and content to multiple destinations, and connects to systems that **manage** outputs for workflow, storage, retrieval, and reporting.

The role of our software is "Connection" - receive the input, capture the content, and distribute the documents and data across a business to manage for further use and value.

Let's build true CONNECTIONS! All companies conduct business using a combination of electronic, soft, and hard document formats. The FabConnect suite creates "connection" within - and filling the gaps across - all three formats. We do this by leveraging our exceptional print driver technology, which is easy to deploy, easy to adopt, and creates an exceptionally high-quality product for digital transformation.

**SysConnect is one of the three components of the FabConnect Suite. Find out more about our entire range of products at FabSoft.com/products*

Book a demo to see how SysConnect can Connect the documents across your business! Schedule your SysConnect demo at FabSoft.com

- The FabSoft Partner Portal is your resource for configuring solutions for each customer. Use the Partner Portal to compare features, purchase licenses, view your orders, download licenses, access support information, track support requests, and view customer usage analytics.

Sys Connect

FUNCTIONALITIES

Save to folder / PDF

One Printer Spooler

One Advanced Printer Driver

Multi-destination Routing

Barcode Generator & Reader

Add Optional Connectors

Power Automate Connector

E-mail Connector

Fax Connector

File Sharing Connector

ECM (Electric Content Management) Connector

LPD Server Extension

TCP / IP Extension

Easily expand the reach of document workflows by adding **user licenses** for:

- **Advanced Print Drivers** – for input to SysConnect from a desktop user
- **Desktop Form Fillers** – to complete pre-defined forms from a desktop
- **Document Authority Controller** – to create document approval workflows
- **Printer Spoolers** – For higher volume or for data intensive print applications, add up to 20 Printer Spoolers per server.

- FabSoft licenses SysConnect on an annual subscription basis.
- Core features of SysConnect are licensed per server.
- License includes Level 3 engineering support and continuous software maintenance to assure all features and connections remain current and functional.

Our technical specifications are the reason FabSoft has exceptional capabilities for such a wide array of use cases and functions.

The Input Agent

- Communication Transport Protocols
 - Advanced Print Driver
 - Watch Folder
 - TCP / IP
 - LPD Data Extension
- Document Source Systems
 - Applications: Windows OS Applications- Mainframe / Server-hosted LOB applications, Web Application
 - Servers: Print server, Scanner server, Cloud Server, Roaming VM
 - Drivers: Windows print driver (including XPS), Port service (LPD and TCP/IP)
 - Database / SQL Option
- Document Source Format
 - PDF, Post-Script, PCL, ASCII, XML, CSV, TIFF, EMF

The Distribution Agent

- Workflow
 - Per Workflow Design
 - Automate output format
 - Automate workflow management: (Optional tools: TagDoc, Desktop Filler, Document Authority Controller)
 - Automate destination routing
- Print
 - Spooler (up to 20 w/ multi-threading)
 - Print to form

The Management Agent

- Workflow Design: Workflow Designer Tool
- Form Design: SysConnect Form Designer
- Workflow Distribution: Centralized
- Utilization Reporting:
 - Form analytics

The Capture Agent

- Recognize:
 - Form and data recognition using
 - Intelligent zones (raster, vector)
 - Zonal OCR
 - Structured field recognition
- Modify:
 - Per Form Design rules
- Extract:
 - Form data
 - Field data
 - Images
 - Barcodes (1D & 2D)
- Classify:
 - Based on document information
- Barcode generator
- Print to any printer
- Print with finishing control
- Send
 - Spooler Folder
 - Email Connector
 - Fax Connector
- Store
 - Shared File Storage Connector
 - ECM Connector
 - ERP Connector Option
- Connector analytics
- TagDoc analytics
- System Health Reporting:
 - Input source status
 - Output source status

FabSoft has been a leader in the capture and management of transactional documents since 1992. We have over 250,000 installations worldwide and continue to deliver innovative software to support small, medium, and large global enterprises. FabSoft has solutions for every industry.
