

Pexip Connect for Teams Rooms

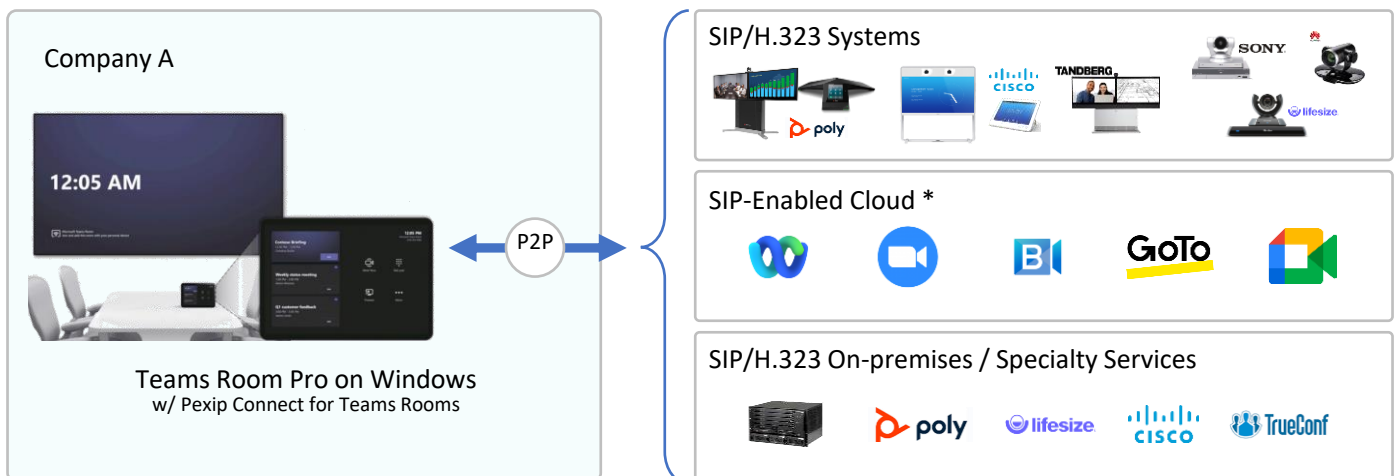

Enabling Microsoft Teams Rooms to call other meeting services

What you need to know

- Requires a Teams Rooms Pro on Windows licensed device
- Included with Pexip Enterprise Room Connector
- Available a-la-carte

Why Pexip Connect for Teams Rooms

Multiplatform enable your Teams Room based conference rooms to ensure your users can join any standards capable meeting service

Customer Benefit

Now its easier than ever to add Teams Rooms devices to existing video conferencing deployments. Pexip Connect for Teams Rooms enables:

- Calling directly from Teams Room device to SIP/H.323 enabled video conference meetings, such as Webex, Zoom and others. Organizations that have moved to Teams often get external invites. Now you can easily join from Teams Room devices
- Direct calling to/from the Teams Room device to internal and external SIP/H.323 VTC devices. Critical to maintain current business practices that revolved around making direct calls

About Pexip for Microsoft

Pexip is a top-tier ISV partner of Microsoft and works closely with the company both on product development/engineering, as well as the go-to-market with customers and partners. In 2022, Pexip was awarded the SaaS Partner of Year award from Microsoft Norway, Pexip's host country.
