HSO's DnA Framework: A Suite of Data & Analytics Offerings

Data Strategy Assessment & Roadmap

Evaluate your current data and analytics landscape, develop a data strategy aligned with your business objectives, and optimize data assets to support data-centric decision-making during your digital transformation

Modern Data Platform Accelerator

Enable seamless digital transformation, data-driven decision-making, and innovation by leveraging a secure, streamlined solution with configurable data pipelines, advanced data models, and swift time-to-market capabilities, ensuring higher ROI

Integration Middleware Accelerator

Facilitate seamless communication, data exchange, and synchronization between applications, partners, suppliers, etc., ensuring data interoperability while utilizing native Azure services for scalability and optimized infrastructure costs

Advanced Analytics Adoption Accelerator

Discover the power of out-of-the-box reports, delivering operational and strategic insights quickly, and optimizing decision-making, operations, and opportunities through intuitive and visually appealing presentations of data and KPIs

AI-Driven Workshop

Prepare for AI/ML adoption by profiling and validating data readiness, identifying use cases, and exploring Microsoft OpenAI and generative AI models to unlock opportunities, optimize processes, and enhance customer experiences

AI-Driven Workshop

About the Offer

Prepare for AI/ML adoption by profiling and validating data readiness, identifying use cases, and exploring Microsoft OpenAI and generative AI models to unlock opportunities, optimize processes, and enhance customer experiences.

Why HSO for Data & Analytics

1 — Azure Expert MSP

As an Azure Expert MSP, we have demonstrated a deep understanding of Azure data capabilities, best practices, and proven expertise in delivering Data & Analytics projects for our customers.

2 — Strategic Data Guidance

We provide valuable strategic guidance to align your business objectives with the capabilities of Azure, helping you define your data goals, identify opportunities for innovation, and create a phased approach to execute your data strategy.

3 — Early Access to Azure Innovation

With early access to new Azure services, features, and updates, we can guide you on leveraging the latest data capabilities and help you adopt emerging technologies to drive business growth and innovation.
