Discover, Envision, Educate and Plan for Microsoft Endpoint Management & Security

Microsoft Endpoint Manager
Build Intent Workshop

This workshop is designed for CDI to learn about your priorities, initiatives and key drivers in your endpoint management and security strategy. CDI will then showcase cloud-based endpoint management and security technologies from Microsoft with hands-on activities in a production or a pilot environment.

In addition, you will learn how the Microsoft 365 E3 license bundle supports the entire device lifecycle. During the workshop, the following activities will be performed/addressed:

- Showcase Microsoft Intune features related to managing the entire device lifecycle and enabling these features in the customer environment, focusing on cloud-only management for selected users and devices

- Understanding a customer's endpoint management goals and objectives

- Showcase Azure AD Premium P1 and Defender for Endpoint features that help to protect identities, devices, and applications in the customer environment

- Defining a customer's device security posture

- Gaining insights into a customer's devices landscape

CDI Solutions Pillars

- Security
- Modern Applications
- Intelligent Operations
- Digital Workflow
- Digital Workspace
- Hybrid Cloud Infrastructure

Endpoint Management with Security Workshop modules

Assess
- Pre-engagement call
- Customer questionnaire
- Endpoint Management with Security overview
- Security posture assessment

Art of the Possible
- Secure your identities and devices
- Simplify IT management with Intune
- Upgrade to Windows 11
- Optional modules

Build the Plan
- Value Calculator
- Results and Next Steps
- Reports and Recommendations

Secure your identities and devices
- Azure AD overview
- Conditional Access
- Microsoft Defender for Endpoint
- Windows 11 overview
- Windows Autopatch overview

Simplify IT management with Intune
- Enroll overview & enablement
- Configure overview & enablement
- Protect overview & enablement
- Support & Retire overview & demo

Upgrade to Windows 11
- Windows 11 Enterprise overview
- Upgrading and deploying Windows 11 Enterprise
- Refresh Windows devices

Optional modules

Microsoft Edge
- Microsoft Edge

Analytics and Reporting
- Endpoint analytics
- Intune reporting and Graph API

Microsoft Devices
- Microsoft Surface
- Surface Hub
- Microsoft Teams Rooms
- HoloLens

Intune for Education
- Intune for Education deployment
- School Data Sync deployment

MDM Migration
- MDM migration overview
