

SYSTEM OVERVIEW

REINVENT YOUR SUPPLY CHAIN

THE ATTABOTICS SOLUTION

SYSTEM OVERVIEW

- ✓ *Direct access to all bins*
- ✓ *No single points of failure*
- ✓ *85% reduction of space requirements*
- ✓ *Up to 75% operational cost reduction*
- ✓ *Add robots and workstations without interrupting operation*
- ✓ *Ergonomic workstations with 300+ bin presentations per hour*
- ✓ *Scalable design accommodates any shape and expands in any direction*

KEY DIFFERENTIATORS

- ✓ *Expandable in 3D*
- ✓ *Robots travel in 3D*
- ✓ *Eliminates SKU slotting*
- ✓ *Dynamic storage allocation*
- ✓ *Automatic induction capability*
- ✓ *Integrated sortation and sequencing*
- ✓ *Rush order presentation in <90 seconds*

MICROSOFT AZURE MANAGED APPLICATIONS

- ✓ A private 5G mobile network on Azure Stack Edge managed by an MEC platform allows Attabotics to provide customers with a lower latency and high bandwidth wireless network for command and control of Attabots
- ✓ IoT Central gives real-time visibility of all assets across the entire supply chain network generating holistic views of performance, ability to scale rapidly, and remote system monitoring
- ✓ Azure IoT Central, Microsoft's fully managed, highly secure IoT app platform simplifies the collection of on-premise data from the Attabots and Nexus control system. Azure Sphere integration with the embedded platform of each Attabot provides a secure, encrypted network connection to stream individual Attabot telemetry
- ✓ Azure Stack Edge dramatically reduces the on-site server hardware complexity by seamlessly merging local compute, storage and AI/Machine learning capability with the full power of the Azure cloud
