

# Migration to Microsoft Dynamics 365 for Finance and Operations for customers of previous versions of Microsoft Dynamics AX

## Value proposition

GMCS offers customers of legacy Microsoft Dynamics AX versions who do not have an active BREP migration to the Microsoft D365 for Finance and Operations cloud solution. After a brief and profound analysis of your IT landscape and existing Dynamics AX solution ecosystem, we provide you with a practical and comprehensive approach to Dynamics 365 migration. Microsoft D365 for Finance and Operations provides customers with business apps built on Azure and tightly integrated with Office 365 and Microsoft Power Platform.

### Your Benefits

- You are upgrading to the newest Microsoft Dynamics version without paying penalties for not renewing BREP
- Paying for the new solution on a SaaS base does not require purchasing new licenses. You start paying only for those resources you use at a specific point in time
- Upgrading Microsoft Dynamics 365 with the last updates is no more headache. In the new cloud architecture, everything happens automatically without the danger of a negative impact on your developments
- There are no traditional infrastructure administration costs and no risks associated with system administrators leaving
- There are new opportunities and horizons for the development of the solution for many years

### Who is this offer for?

- You have accumulated many problems, and the only way to resolve them is to move to a new system. Still, you want to preserve the investment that you made in train people in Microsoft Dynamics technologies
- You have lapsed Microsoft Dynamics AX BREP, or you are not satisfied with the upgrade conditions for an existing Microsoft Dynamics AX license
- You are struggling to administer, maintain, or scale legacy solutions and want to move from on-premises to SaaS
- You are tired of investing in system upgrades instead of improving the quality of new developments and creating new solutions for your business
- You want to unleash the potential of the accumulated data in the system and make it available to create new products for your business

### What do we propose to do right now?

- Contact us and request a free Solution Assessment Application Modernization based on Microsoft's recommended practices for migrating to Microsoft Dynamics 365 for Finance and Operations
- We will analyze the existing IT landscape and the existing solution, suggest the best ways to migrate applications and data to new versions of the Microsoft platform. We will also make a preliminary estimate of the cost of migration
- Based on the developed program, we will provide a Microsoft certified professional team for the phased implementation of the solution migration plan to Microsoft Dynamics 365 for Finance and Operations
