

MODERNISE YOUR BUSINESS APPS

With our Office 365 PowerApps and Flow package, NZTA rapidly developed new business processes, upgraded their security and retired a number of legacy apps in Excel and Access that the organisation had relied upon for many years.

CUSTOMER SUCCESS STORY

New Zealand Transport Agency

The organisation is complex and previously struggled to prototype and automate new processes in response to rapidly changing business needs

Over a six month period, NZTA modernized a number of regulatory, business change request and inquiry registers across four business areas with monthly develop and release cycles – faster and more cost effectively than ever before.

More agile

- With this programme, NZTA could scope out a new requirement and seek budget approval to start to innovate **within 4 hours ...**
- **Within 4 weeks** have a new prototype process available to test and refine and;
- **Within 8 weeks** have a refined process for testing and review.

Less cost

- Produced business process improvements rapidly, with less internal effort and less investment requirement
- Utilised existing Office 365 licenses.
