Neudesic's
Intelligent Ops Accelerator

Transform IT operations harnessing AI-powered insights for enhanced efficiency and increased reliability

Neudesic's Intelligent Ops Accelerator enables real-time issue detection and accelerated incident resolutions with AI/ML models.

Aligned with Microsoft best practices and powered by the OpenAI platform, our accelerator automates workbooks and tasks, eliminating manual operations and supports managing ticket complexity with its ticket orchestration engine. Neudesic leverages Azure security and monitoring services to ensure seamless end-to-end infrastructure operations and application platforms. Driven by automation and artificial intelligence, our Intelligent Ops accelerator detects and responds to security incidents promptly.

Enhanced IT Security with SecOps

Leverage Azure native services to enable organizations to quickly respond and remediate issues

End-to-End Observability with AIOps

Providing a comprehensive solution to monitor and maintain complex systems while aggregating and orchestrating events across the platform

Improved Total Cost of Ownership with FinOps

Leverage AI to gain insights into your Azure solution costs and impacts, enabling your organization to focus on innovation

Our End-to-End Approach for Intelligent Ops
