

# Streamline your Legal Operations with Thread Software.

## About Thread Legal Software:

Thread has evolved from 20 years of providing IT systems and support to law firms, in-house counsels, lawyers and barristers all around the globe. Beyond just integration, Thread is the only Legal Matter Management solution in the world fully built on M365. We assist clients in improving their overall performance, particularly cash flow and profitability.

## What we offer

We are proud to provide the world's only Legal Matter Management software fully built on Microsoft 365. We help legal professionals all around the globe automate their complex legal tasks, streamline, simplify and improve how they work, as well as freeing up valuable time so they can focus on generating more value for their business.

Our comprehensive, flexible, and easy-to-use cloud-based Legal Matter Management Software gathers everything they need to manage a client, case, or project, and Microsoft tools and data, ALL together into one intelligent interface; delivering the speed, ease and security that's simply not achievable with 3rd party integrations.

Our clients enjoy the familiarity, power & security, and latest updates of Microsoft, with an interface and suite of functions, built specifically for legal.

## What our customers are saying

"One of the key functionalities that we expected is to have integration with Microsoft 365. Those systems that didn't have that automatic integration fell out of favour pretty quickly as well as the ones that did not favour the data management and the GDPR requirements, where data wasn't stored in the UK".

– Darko Glavas, Commercial Director of One Housing
