## OUR JOURNEY IN A FEW FACTS

- ✓ Replaced Symantec solution with Microsoft 365 E5
- ✓ Modern workplace & Azure protection
- ✓ 30.000 employees worldwide
- ✓ 24/7 monitored by our SOC
- ✓ 3 months implementation time
- ✓ 6 months ROI towards lower TCO

VebeGo is a company with over 30.000 employees that focuses on facility, (social) personnel and healthcare services. They have a big social footprint and are determined to vitalize healthcare and have a positive impact on society. To achieve this goal, they needed help. VebeGo's goal was to add advanced security to their work environment, while giving their end users more flexibility. A standard security solution would not suffice: VebeGo needed an MSSP that could fully replace their outdated Symantec solution with Microsoft 365 E5 features. We completed VebeGo's transformation within 3 months; from 'no active security features' to 'all E5 features deployed & enabled'. Their ROI was reached within 6 months beating Symantec in terms of TCO. To increase added value, VebeGo is using our portal for fast onboarding, zero-day malware reports and user & workload classification. Of course 24/7 monitored by our SOC.

VebeGo is now up-to-date with all the latest security features, simply by subscribing to InSpark's Managed Security service. Within 3 months VebeGo deployed all necessary E5 features and they are now protected by Microsoft ATP services, Secure Score & InSpark's best-practices security reference design. To increase added value, VebeGo is using a personalized Customer Portal for fast onboarding, zero-day malware reports and user & workload classification. With our CSC, VebeGo's IT team has been unburdened, with the best protection on all security levels, 24/7 follow-up on incidents, and their cloud continuously fitted with all the latest Microsoft security features.

Now VebeGo can fully focus on creating impact and doing good. Doing the right things takes time and attention. Focus is therefore essential and that's why we are proud that we could help VebeGo transform and improve.

**“VEBEGO HAS CHOSEN INSPARK'S MICROSOFT SECURITY SERVICES AS THEY ARE SECURE, CLOUD-BORN AND FUTURE-PROOF, WITH HASSLE FREE EXECUTION IN THE BACKGROUND”**

ROGIER VERBERNE, DIRECTOR IT VEBEGO

# KPMG

## OUR JOURNEY IN A FEW FACTS

- ✓ 155.000 employees
- ✓ Launching Cloud Security Center customer
- ✓ 24/7 monitored by our SOC
- ✓ Protecting all Azure subscriptions

Several years ago we assisted KPMG during the transformation of their IT services. For 155k employees worldwide we implemented an advanced monitoring solution. While moving more and more workloads to the cloud, the GDPR forced the active security monitoring of these environments. A state-of-the-art cloud native SOC for cloud security monitoring was needed, so we started developing our CSC in collaboration with KPMG.

**“WE MUST ENSURE THAT THE CLOUD IS DESIGNED TO BE AS SAFE AS POSSIBLE, BUT ALSO THAT IT IS CONTINUOUSLY MONITORED. BASED ON OUR LONG RELATIONSHIP WITH INSPARK, WE DECIDED TO BE THEIR FIRST SOC CUSTOMER, WHICH LED TO AN ORGANIZED AND SUCCESSFUL SECURITY SERVICE FROM THE START”**

ERIC VAN DEN BROEK, CIO KPMG
